

504MAN Resource Management

Resource Planning and Control

Week 3 – Session 9

Don't forget to tap in

Our responsibilities:

- Understand why students aren't attending.
- Provide support to help you succeed.
- Be compliant with regulations and educational policies.
- Report students who are not attending to UKVI.

Your responsibilities:

- Use your own ID card to register your attendance.
- Be familiar with and follow institutional policies and legal regulations.

- !! **Do NOT tap in on behalf of other students.** This can result in a violation of visa conditions and/or institutional policy and procedures.
- !! **Do NOT give your student ID card to someone else** to let them into the library or other campus buildings as this is an offence under institutional regulations.

Extensions & Deferrals – What You Need to Know

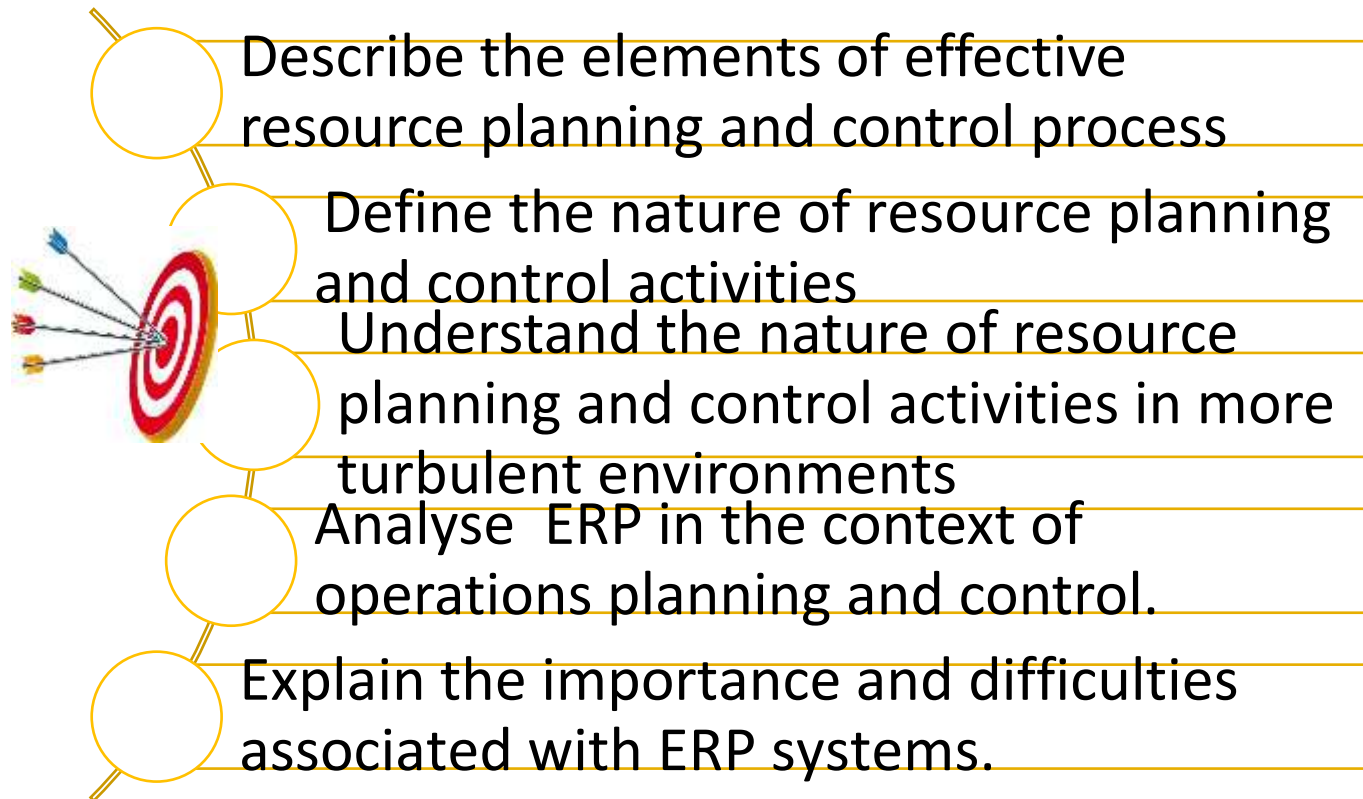

-  Deferring may delay course progression or graduation.
- Tier 4/Student Visa holders: Deferring may affect Post Study Visa eligibility.
- For visa advice, contact: visahelp.io@coventry.ac.uk
-  Use one form per semester for multiple components/modules.
- Do not submit multiple forms.
- Form link: <https://livecoventryac.sharepoint.com/sites/students-registry-extensions-deferrals/SitePages/Extension---Deferral-Form.aspx>
-  Before submitting:
- Engage with your tutor and library academic writing support.
- Where required, seek support from our Welfare Team through Spectrum Life
- For help with form completion, contact the Student Success Coaches at Main Reception.

Intended Module Learning Outcomes

1. Analyse the importance of effective and efficient use of resources in organisations
2. Analyse principles which underpin effective procurement of resources
3. Investigate and plan the resources required to achieve an organisations aim and objectives
4. Analyse the procedures and practices that ensures resources are maximised and remedial actions taken where appropriate
5. Evaluate and appraise the use of resources against organisational plans
6. Analyse principles that underpin effective supply chain management

Session Outcomes

At the end of this session learners should be able to:

Read – 15 minutes

- *Go to Aula and read the article – “What Exactly Is Resource Planning? The Basics for Novices and for Pros”.*
- *Summarise your understanding of the article and share your thoughts with the rest of the class.*

Resources

Source: <http://activeops.com/>

Resources

Resources are any of the following:-

- People
- Money
- Facilities
- Power
- Materials
- Space
- Plant & Equipment
- Information
- Technology
- Time (?)

Time as a Resource?

- Time is a constraint.
- You can alter how much time, by changing one of the other resources.
- You could ask for more time.....

Resources

- Resources can be:
 - Exhaustible - Coal, gas, oil
 - Replaceable - Bricks, raw materials
 - Re-usable - People, machinery
- Resource limitation can be
 - Time limited - must be finished by day 10
 - Resource limited - only 2 electricians

Resource planning

Source: <http://activeops.com/>

So how do we plan for resources?

- We can make **estimations**
- We can **forecast**
- Look into availability **strategically** and **project specific**
- Plot your findings onto a **graph**

Plan ahead

Availability

- We can analyse resources at several levels e.g.:
 - Strategic
 - Project Specific

Strategic Resourcing

- Often done by HR or a resource manager
- Used for overall company strategic resourcing
- Are there adequate resources overall? – to meet the 2 year plan?
- Looking at long timescales – at least one year

RESOURCE PLANNING AND CONTROL

All activities involved in the design of an operation should provide the nature and the shape of the **transforming resources** that are capable of satisfying customers' demands

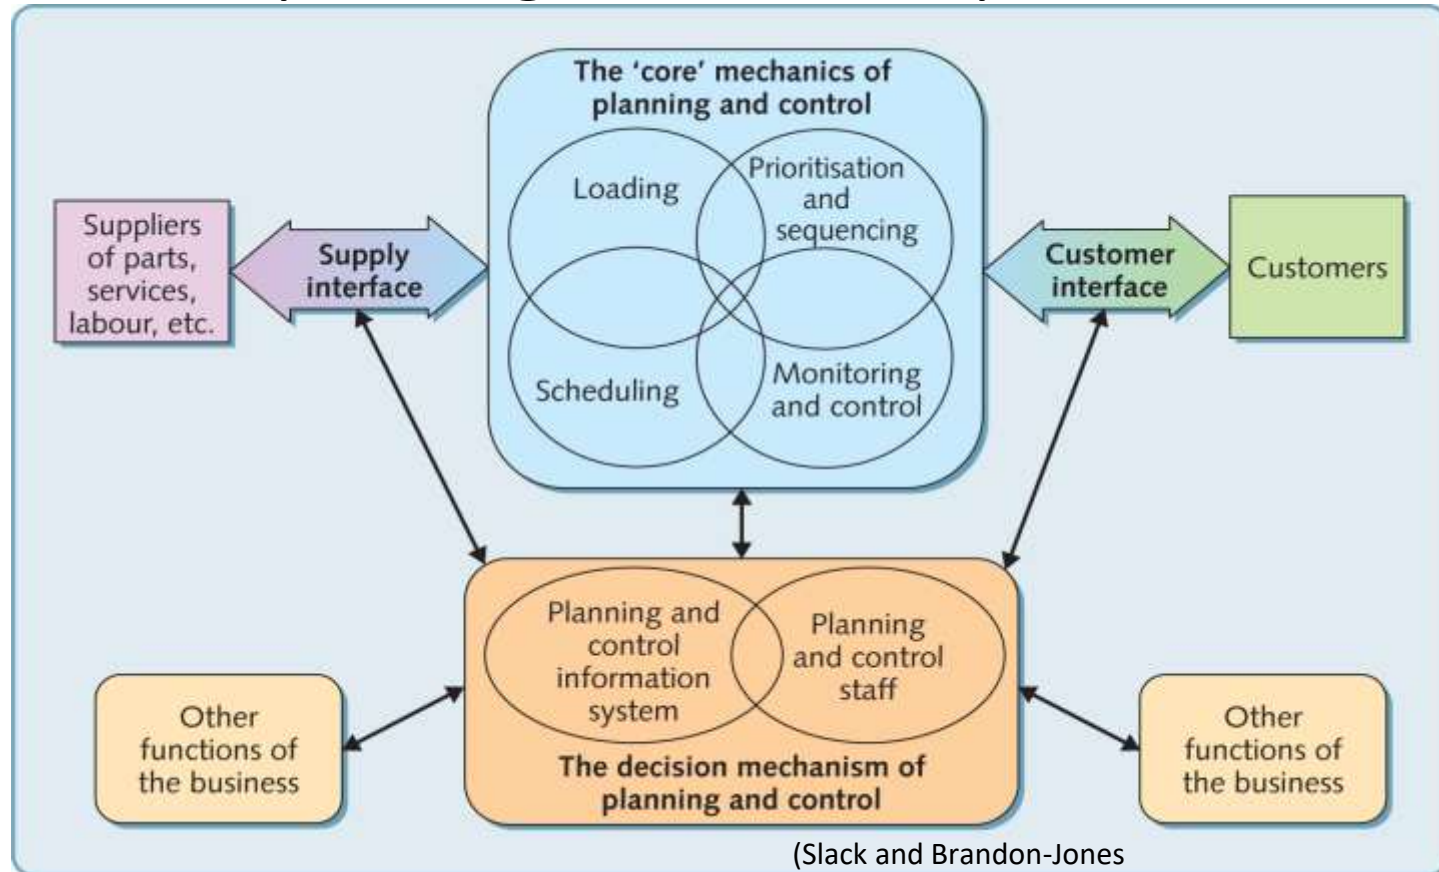

This is done by planning and controlling the activities of transforming resources on a day-to-day basis to ensure the appropriate supply of products to meet **the requirements of the market**

Therefore, planning and controlling is concerned with the activities that attempt to **reconcile the demands of the market** and the ability of the operation's resources to deliver

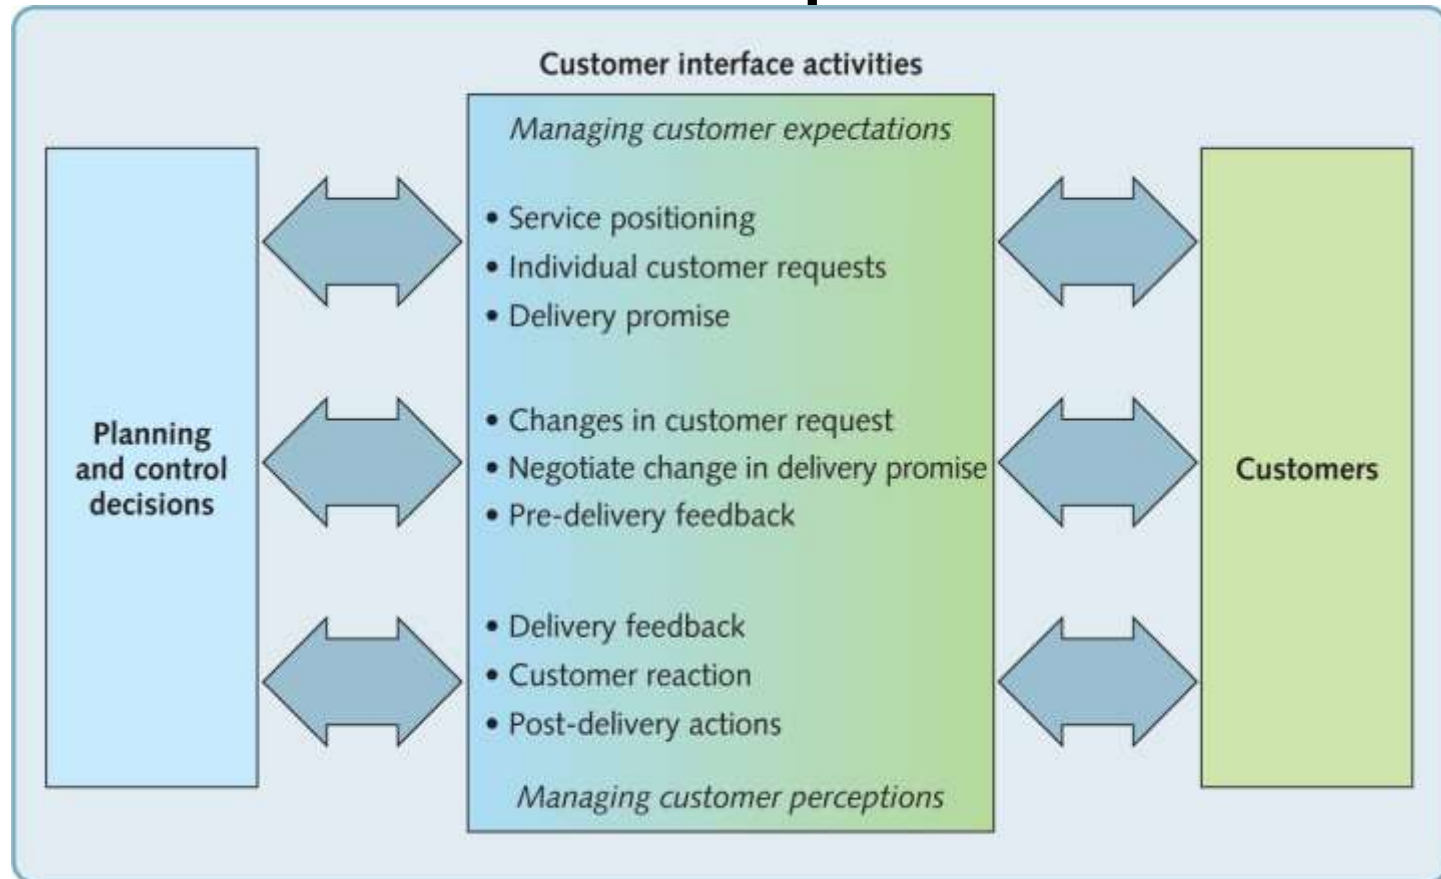

(Slack and Brandon-Jones 2018, 315)

The key elements of a resource planning and control system

(Slack and Brandon-Jones
2018)

The customer interface as a 'customer experience'

A **plan** is a formulation of what is intended to happen at some time in future.

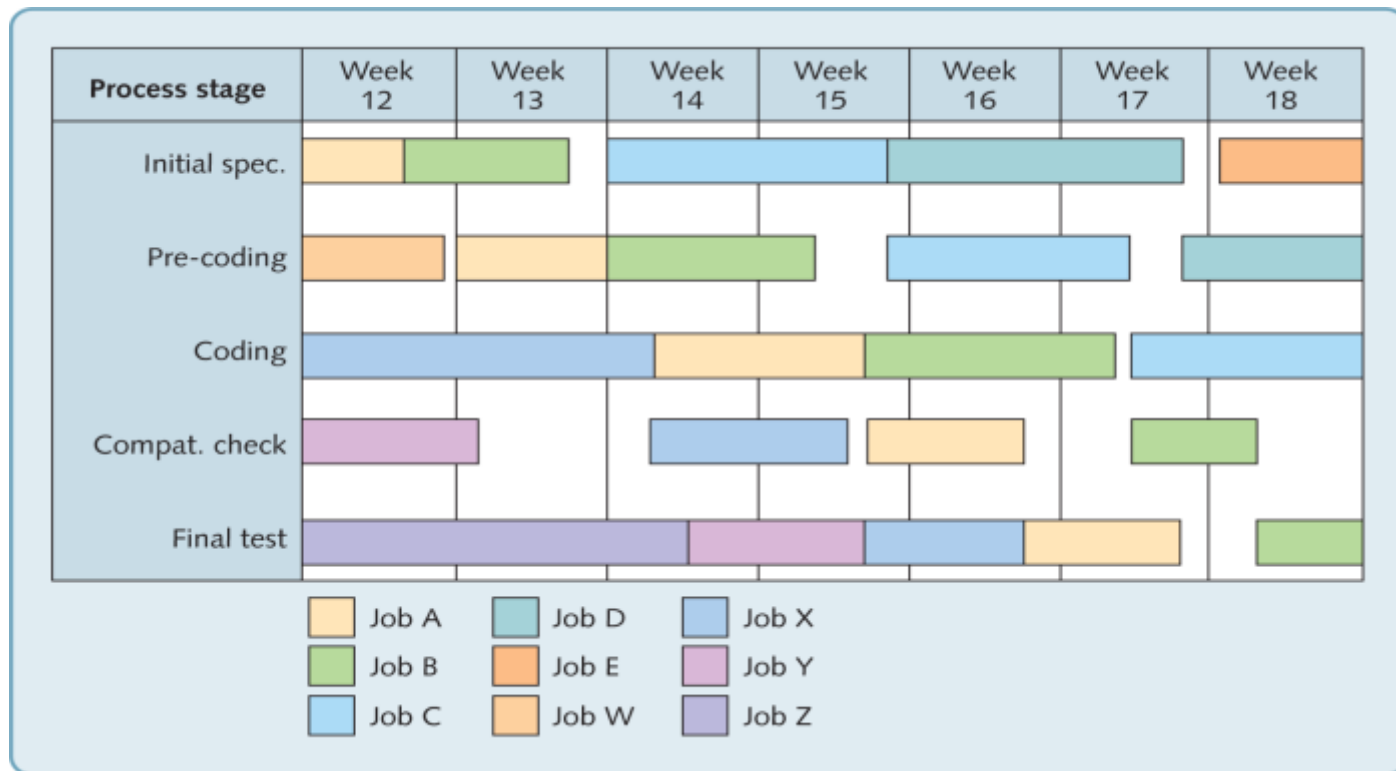

Control is the process of coping with changes to the plan and the operation

The degree of uncertainty in demand affects the balance between planning and control

- The greater the uncertainty, the more difficult is to plan, and greater **emphasis must be placed on control**

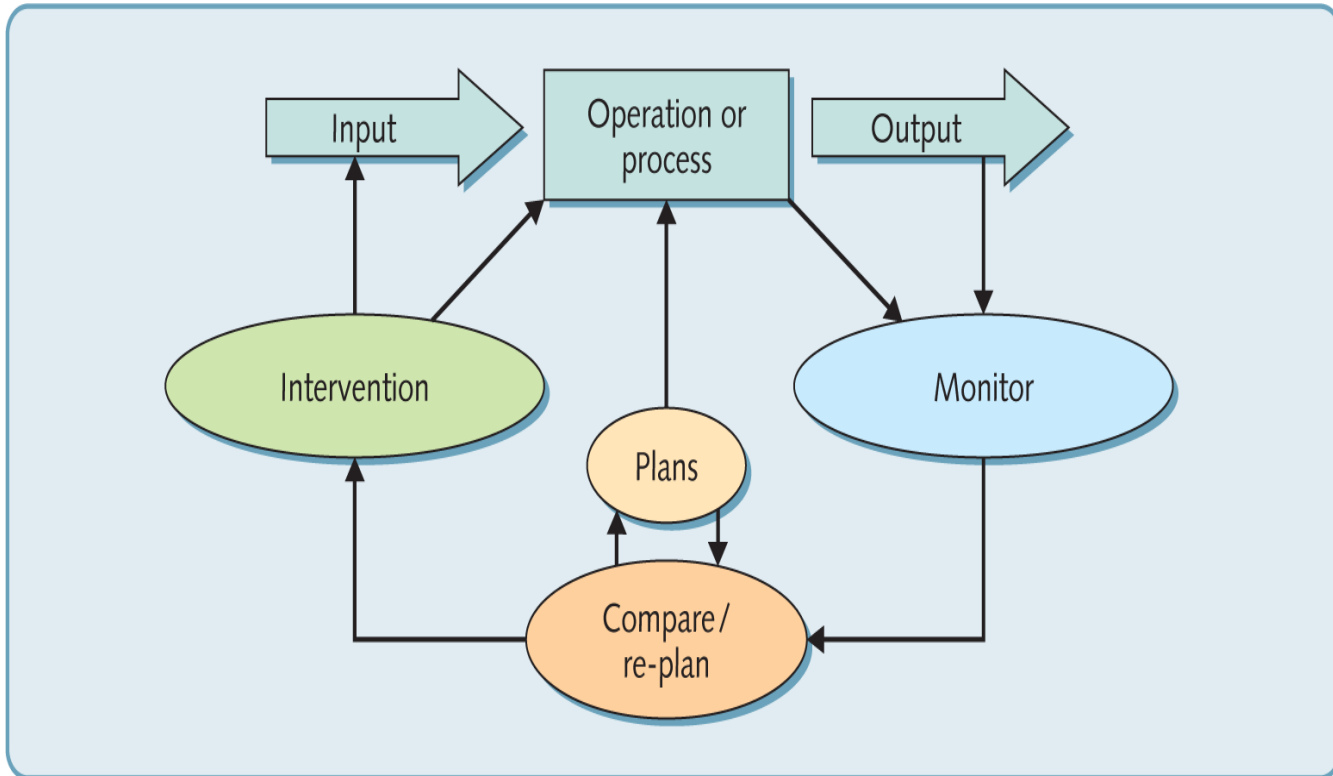

Scheduling

- Gantt chart showing the schedule for jobs at each process stage

(Slack and Brandon-Jones
2018)

Simple model of controlling

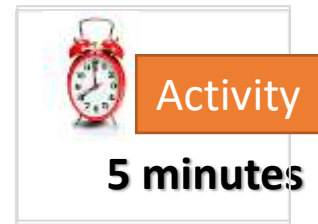

Team activity – 30 minutes

- *In teams of 3 or 4, research any fashion business organisation and explain its expansion activities.*
- *What was the reason for their expansion?*
- *Think about the resources the organisation required for the new activity or activities and list these resources.*

Traffic Light *it*

Where is your learning at?

Red = I have misunderstood some of the topics.
(write down 2 questions that you need help with)

Amber = I have understood most of the topics so far
(write down 1 question and 1 key theme you have understood)

Green = I have understood the topics so far (write down 2 key themes from the lesson to show your understanding)
