Brand Architecture

What's branding?

- It's the marketing practice of creating a name, symbol or design that identifies and differentiates a product from other products.
- “**Branding** is the art of aligning what you want people to think about your company with what people actually think about your company.”

What is Brand Equity?

Brand equity is the added value endowed on products and services, which may be reflected in the way consumers, think, feel, and act with respect to the brand.

Branding vs marketing

- Marketing may contribute to a brand, but the brand is bigger than any particular marketing effort. The brand = remains after the marketing has swept through the room. It's what sticks in your mind associated with a product, service, or organization—whether or not, at that particular moment, you bought or did not buy.
- The brand is ultimately what determines if you will become a loyal customer or not.
- The marketing may convince you to buy a particular Toyota, but it is the brand that will determine if you will only buy Toyotas for the rest of your life.

Branding vs Marketing

- **Is branding a cost centre ?**

On the surface, yes, but the return is **loyalty**.

The return is

- Sales people whose jobs are easier and more effective,
- Employees who stay longer and work harder,
- Customers who become ambassadors and advocates for the organization.

Advantages of Strong Brands

- Improved perceptions of product performance
- Greater loyalty
- Less vulnerability to competitive marketing actions
- Less vulnerability to crises
- Larger margins
- More inelastic consumer response
- Greater trade cooperation
- Increased marketing communications effectiveness
- Possible licensing opportunities
