

Core Marketing Frameworks

1. **7Ps of Marketing (Product, Price, Place, Promotion, People, Process, Physical Evidence):**
 - Ensures all elements of a marketing strategy are aligned.
 - Key for service and product-based businesses.
2. **RACE Framework (Reach, Act, Convert, Engage):**
 - Guides digital marketing across customer lifecycle stages.
 - Focus on building audience, interactions, conversions, and loyalty
3. **STP Model (Segmentation, Targeting, Positioning):**
 - Divides the market into segments, identifies the target, and positions the product accordingly.
4. **SWOT and PESTEL Analyses:**
 - **SWOT:** Internal and external analysis of Strengths, Weaknesses, Opportunities, and Threats.
 - **PESTEL:** External macro-environmental analysis (Political, Economic, Social, Technological, Environmental, Legal)

Value Creation Models

1. **AIDA (Attention, Interest, Desire, Action):**
 - Tracks the steps consumers go through in the buying journey
2. **Customer Lifetime Value (CLV):**
 - Calculates the total revenue potential from a customer over time.
3. **Value Proposition Canvas:**
 - Matches customer pains and gains with product features to deliver value.

Digital Marketing Concepts

1. **Marketing Automation:**
 - Streamlines repetitive tasks (email campaigns, customer segmentation).
2. **Omnichannel Strategy:**
 - Ensures consistent messaging across multiple platforms (social media, in-store, online)

Emerging and Innovative Approaches

1. **Gamification in Engagement:**
 - Adds game-like features to encourage interaction and loyalty.
2. **Predictive Analytics:**
 - Uses historical data to anticipate customer behaviors.
3. **Diffusion of Innovation:**
 - Models how new products spread through market segments (Innovators, Early Adopters, Majority, Laggards)
