

Identifying Resources

Warm up Quiz

<https://create.kahoot.it/details/af88192d-b191-4a40-bd1e-cb303089b157>

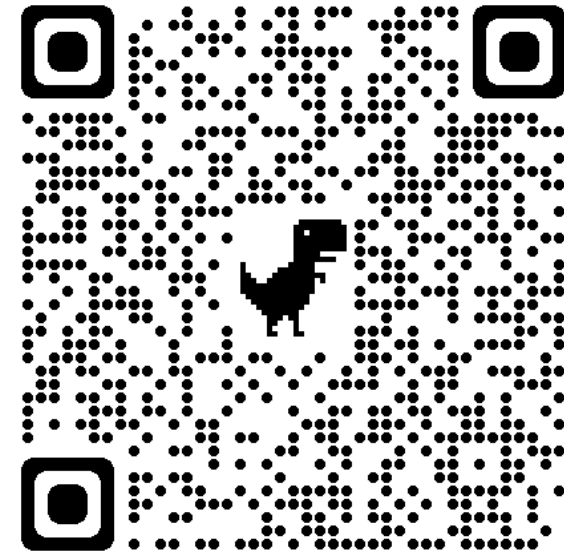

Think:

- Your plan should explore:
 - Resources required?
- Ideas?

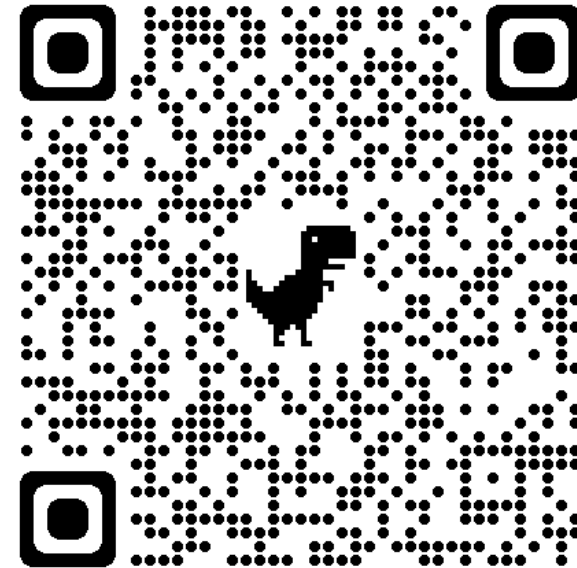

Think:

- Your plan should explore:
 - How will you procure the resources required?

Think:

- Your plan should explore:
 - How will you monitor the effective use of resources?

Types of Resources

Labour

- Various professionals, employees, and team members with different skills needed to complete a project successfully.

Equipment

- Necessary tools for project completion: from software or hardware to hammer or drill, depending on a company's specifics.

Facilities

- An environment for work and project realisation:
 - Offices
 - open spaces
 - meeting rooms, etc.

Materials

- Resources needed to produce outputs
- From pens and paper to raw materials for house building.

Capital

- The most important type that allows buying all we listed above.

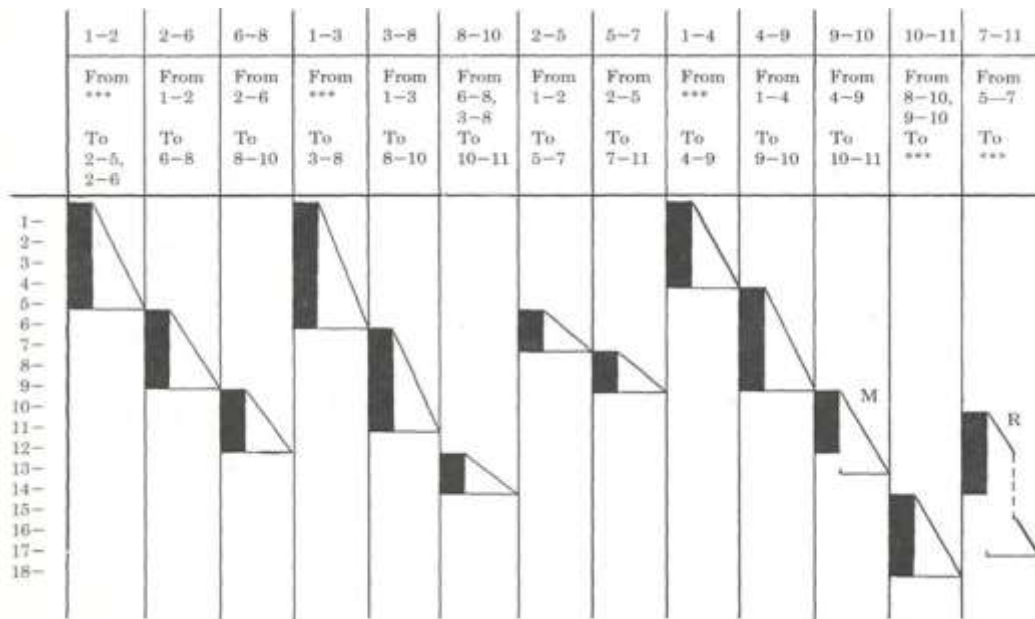

Resource Allocation

- Every project consists of tasks. If one of them is completed with a delay, there is a high probability that the entire project will be completed with a delay.
- One of the main reasons for missed deadlines is the lack of resources because of its inappropriate allocation.

- In the late 1800s, Polish engineer Karol Adamiecki developed a visual workflow chart that he called a "harmonogram."

GANTT Charts

- In the late 1800s, Polish engineer Karol Adamiecki developed a visual work flow chart that he called a "harmonogram."
- In around 1910, Henry Gantt, a management consultant and engineer, took Adamiecki's concept to the next stage. His chart was designed to help manufacturing supervisors see whether their work was on, ahead of, or behind schedule, and it formed the foundation of the tool we use today.
