

Week 1 Assignment 1 Instructions + Communication Fundamentals

What are we going to cover today?

- Introduction to this module [402MAN – Communication and Collaboration]
- Overview of assignments 1 & 2
- What is Communication and Collaboration?
- Communication Models

Welcome – A Quick Intro

Agnieszka Stacey, MA, PGDip, Seda, MCIPD

Education

MA in Sociology: Communication and Market Research

University of Wroclaw, PL

MA in Human Resource Management, University of Northampton, UK

PGDip in Personnel Management, Coventry University, UK

PGCert in Employment Law, CIPD, UK

UK Industry Experience

5 years in Account Management

14 years in Human Resources Management: Head of HR, Global HR Business Partner, HR Consultant

UK Teaching Experience and Training

3 Years as an HPL at Birmingham City University

Qualified SEDA teacher (Staff and Educational Development Association)

CPD (Continuous Personal Development) currently
PGCert in Teaching and Learning in Higher Education at Worcester University

Areas of Interest

Innovative Organisational Structures

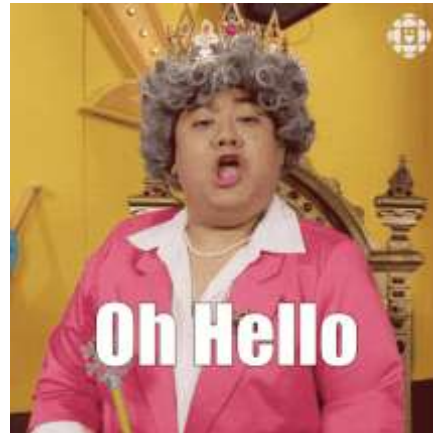

Self- Organising Teams

Human Centred Design

Welcome – A Quick Intro

Quick Intro from you:

- ✓ ***Your name,***
- ✓ ***Why do you study BML***
- ✓ ***What is your favourite management subject***
- ✓ ***A random question***

The way we roll...Attendance, AI Writing and Marking

The Structure of the Module and Attendance

- The face-to-face lectures run Monday to Wednesday
- Each day is divided into 2 sessions
 - ✓ 09:00-10:30
 - ✓ 11:00 -13:00
- You need to tap your card at 9am and then at 11:00am
- If you don't tap at 11:00am, you will be marked as absent for the 11:00-13:00 session – so please remember to tap at 9am and 11:00am
- If your attendance falls below 80% the Student Engagement team will reach out to you to understand the reason and any support mechanism you might need to improve
- Tutorials will happen from **13:00** for 1h after the session Monday to Wednesday and on Thursday at 10am and Friday 10:00am for 2h– they are mostly optional and available to you for any questions ref the content of the module , the assignment etc. The exception is when I book you in for a 121 which will be in weeks 2/3 and 5/6.
- I may also arrange additional 121 with you if I have concerns over your progress or attendance.
- **Does everyone have two 121 sessions in their calendar? If not, please let me know**

Our 121s

Our 121 is there to give you the best chance of passing your assignment and to provide you with in-time support when you need it.

You are expected to bring the following to our 121

- The outline of the structure of your assignment i.e. to demonstrate that you have a good idea of how you are going to divide it into chapters/sections and what each chapter/section will be talking about
- Provide examples of the theories you will be using
- Provide examples of your research done to date
- Bring questions or doubts you have about the assignment, so that we can discuss them

If you don't have the above by the time we have our 121, it will be a signal to me that you may struggle with your work, so more 121s may be scheduled and I will keep a close focus on your progress. If you don't attend our 121s, it will raise my doubt as to whether you are writing your assignment yourself (given that our 121s will be quite close to the deadline) .

The way we roll...Attendance, AI Writing and Marking

AI USE Dos and Don'ts

CU support your use of the AI tools to:

- **Brainstorm ideas for your assignment**
- **Structure your assignment**
- **Understand the areas for your literature research**

CU *DON'T* support the use of AI tools to:

- **Get your references from**
- **Organise your referencing**
- **Write your assignment or parts of your assignment**
- **Paraphrase what AI has written**

Any of the above are considered as cheating and may be subject to the misconduct process

The way we roll...Attendance, AI Writing and Marking

What does seeing an assignment written by AI feel like to the lecturer/marker ?

The way we roll...Attendance, AI Writing and Marking

What does AI Writing look like to the Lecturer/Marker

- A lot of repetition, reframing, particularly of paraphrases.
- A lack of opinion or personal responses or to the subject written about
- Arguments lack depth- on the surface it looks convincing but shows little substance. Shows as a list of potentials i.e. causes, actions, ideas rather than a choice of a specific action
- Generic answers with little that is creative, innovative, or personal
- Writing that reinforces dominant narratives, ideas, or systems, straying into bias on occasions.
- As they predict next word common words (It, is etc) are repeated.
- Lack of any typos which you would expect to see in human generated text.
- Use of American spellings i.e. analyze rather than analyse

In the best-case scenario such work will receive a very low mark, or it will be reported to the Academic Conduct Officer, which *of course is not what anyone wants or needs.*

The best feeling is to know that you succeeded through your own effort.

[AI & Academic Misconduct – The Teaching Knowledge Base](#)

Let's talk Assignment 1 – Referencing

Why is referencing important in academic writing?

What are you demonstrating through having reliable and comprehensive in-text citations and referencing ?

Why are peer- reviewed journal articles the best source for your assignment?

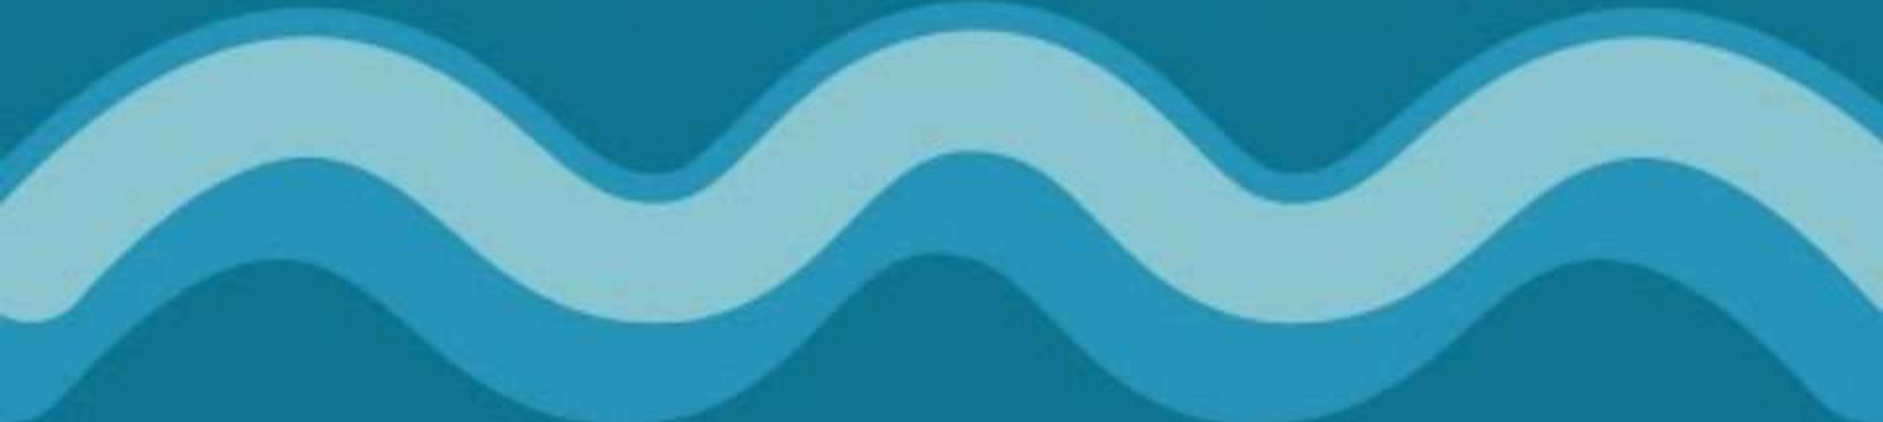

Let's talk Assignment 1 – Referencing

- You should use extensive literature research: Journal Articles, avoid internet blogs or non-academic websites unless they provide, do use industry magazines though.
- You can mix in other sources that are less 'academic' but still viable and highly regarded like Business Leader, Forbes, Harvard Business Review, The World Economic Forum, McKinsey and Co etc.
- To present your organisation, you can use BBC or other News outlets which check their facts.
- You should use APA 7th edition style of referencing.
- In- text citations are a MUST and they all need to link to your reference list
- If you haven't used a source in the content of the assignment, do not list it in the reference list – it doesn't count.
- Lacking in-text citations, or worse, references will considerably lower your mark or if the content of your work is low quality, it may cause you to fail your assignment
- Referencing guidance can be accessed on the Library's [LibGuides pages](#).

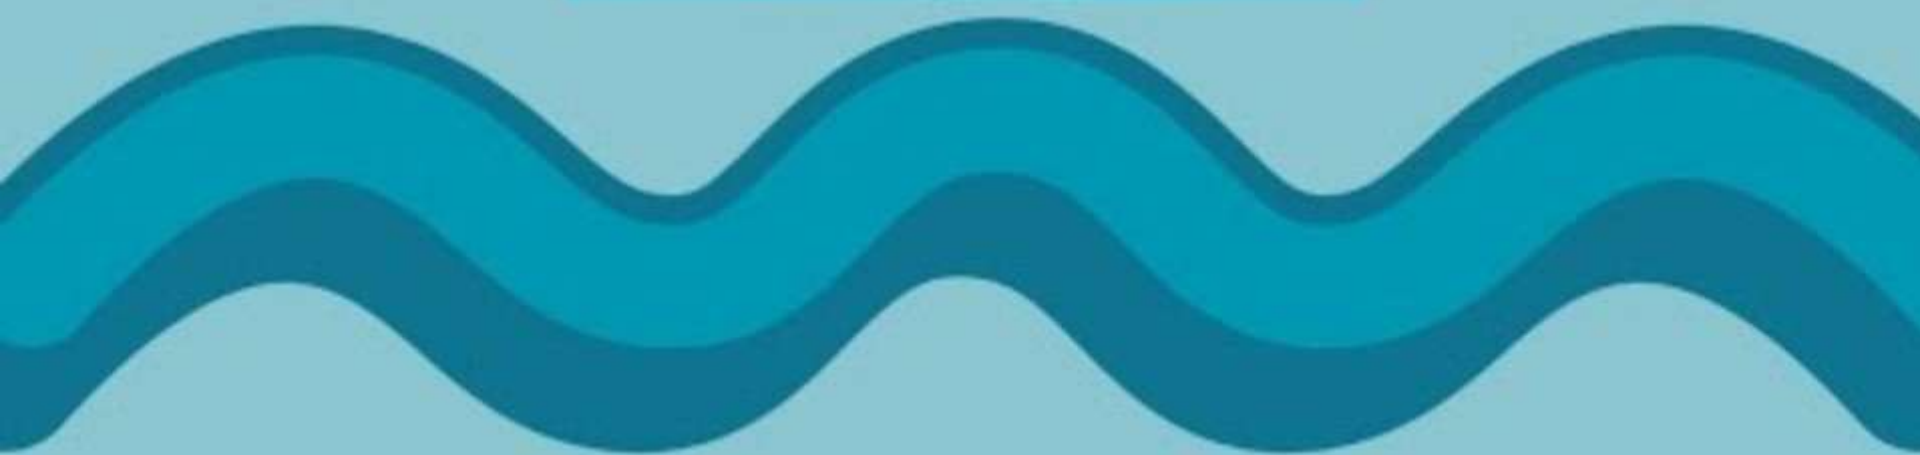

Ensure you understand APA referencing style. Please ask our librarian for a session if in any doubt

WHAT IS

Three horizontal, wavy lines in shades of blue and light blue, creating a stylized wave pattern across the middle of the image.

APA REFERENCING?

IN-TEXT

A decorative graphic consisting of two horizontal, wavy lines in shades of blue, positioned between the 'IN-TEXT' and 'CITATIONS' text blocks.

CITATIONS

REFERENCE

A decorative graphic consisting of three horizontal, wavy lines in shades of blue and teal, positioned between the 'REFERENCE' and 'LIST' text blocks.

LIST

Learning Outcomes

- 1. Demonstrate** a knowledge of the **core principles, theories** and differing methods of communication and collaboration within a range of organisational contexts.
- 2. Reflect** upon your **own interpersonal, communication and collaborative skills** and identify areas for improvement.
- 3. Demonstrate** an **understanding of working with others, teamwork, groups** and group dynamics and across organisational boundaries.
- 4. Demonstrate** a knowledge of **how to communicate and collaborate** effectively using appropriate techniques
- 5. Explain** how **management, organisational culture and structure** can impact communication and collaboration within and between organisations.
- 6. Explain** **effective communication and collaboration** within an organisation.

Assignment 1 - What is a Blog?

The Importance of Critical Thinking

February 12, 2025 / 0 Comments

Paula Levy · Feb 6 · 4 min read

Critical thinking helps you truly understand the problems you are facing and how to solve them.

Let's look at the importance of critical thinking. So many times when people ask us to rush off and start solving it without stopping to think before we do. We're facing new amounts of information before we can make a decision.

As part of your problem solving process, there are going to be multiple stakeholders involved. This increases the complexity of trying to get to an answer. When you do ultimately come up with a recommendation, those big decisions will involve numerous trade-offs. Not everyone is going to be happy with what you recommend. There are going to be long lag times in acquiring the required data to make your decision, and when you finally do make the call, then you're going to be high scrutiny over whether you are right or wrong, and a bad call can have both business as well as personal and professional implications. Add to this unforeseen bottlenecks in getting to that answer, multiply it by the number of problems you're trying to solve every single day, and then divide by the limited amount of time you have.

thoughtLEADERS, LLC

I climbed up a few feet shot of the runner that's when I spotted screamed "OMG K YOU!" and she followed me OBSESSED WITH YOU! me?! Is this real life? I was joking because she knew who I was, she follows me on LinkedIn. Keira took the time to and she said the most thing: SHE has the struggle on her runs that I struggle run videos. Struggle Run was a could unite runners.

How to Write a Blog

- This guide to blogging has been saved on Aula
- Main elements to consider:
 - **Structure** – remember the structure needs to be clear and uncluttered
 - **Name of the Post**
 - **Strong, concise intro to grab readers' attention**
 - **Subheadings signalling key information within**
 - **Content – well-researched, well-written, clear**
 - **Conclusion – main take-away points**
 - **Language** – what language would you be using – is it more formal or informal – keep in mind your audience
 - **Media** – are you going to be using videos (i.e. You tube), pictures?
 - **Theories & References** – remember even though it is a blog, it is still a piece of Academic Writing, so in-text citation, correct references and corresponding reference list are a must!

Based on Wright-Porto, 2011

Writing Skills

- Keep track of your tenses (past/present/future). If you're writing about the past, keep it in the past, and the same goes for the present and future. Nothing makes writing more difficult to follow than a jumble of tenses.
- Me or I. If you are writing or speaking about yourself, use "I" as in "Billy, Mary, and I are going to the mall." Use "me" when you're receiving an action, such as "Charlie gave me the game ball." or "My mother is angry with me for staying out late."
- Numbers. You can use either digits or words to write a number (10 or ten, for example) in the body of a sentence, so which you use is up to you. However, the first word or letter of a sentence should be capitalized so you shouldn't use a number there unless you write it out (Ten).
- Using commas. Unfortunately, some writers use commas to combine too many thoughts into one sentence. It's better to use shorter, simpler sentences than to create run-on sentences.
- Its and it's. In general, "it's" is a substitute for "it is," as in "It's cold outside." "Its," on the other hand, is a form of ownership—"An elephant uses its trunk to pick up food."
- Apostrophes. In following the rules of ownership, in most cases you would use an apostrophe "s" such as "Heather's jacket is red with black trim." However, if the noun is plural, use just an apostrophe, as in "The princesses' crowns sparkled with diamonds."
- Quotations and ending punctuation. In general, keep the period, question mark, exclamation point or other punctuation inside the quotation marks. While blogging, chances are you won't use many direct quotes that require quotation marks, but if you are specifically quoting someone else's work, you should certainly credit them in some way (remember the saying "give credit where credit is due").

(Wright-Porto, 2011,p.10)

Assignment 1

1,500 word self-reflection blog using Driscoll reflective model

Use the Post Office as a case study, you should reflect on the communication and collaboration which took place in the highly scrutinised Post Office scandal.

- You should include key academic theories and principles within your reflective blog (LO1).
- You should also reflect on your own interpersonal, communication and collaborative skills to identify areas you would have acted different, and areas which you could improve because of this reflective blog (LO2).

Assignment 1

1,500-word blog

Research the **Post Office Horizon IT scandal**
Using Driscoll Reflective Model

1500-word (+/-10%) reflective blog for publication in the next edition of the magazine. Using Driscoll Model of Reflection and The Post Office as a case study, you should reflect on the communication and collaboration which took place with their appointed partner, Fujitsu.

Blog /bläg/

NOUN

A regularly updated website or web page, typically one run by an individual or small group, that is written in an informal or conversational style.

VERB

Add new material to or regularly update a blog.
"It's been about a week since I last blogged."

Source: Oxford Languages

Learning Objectives

1. Demonstrate a knowledge of the core principles, theories and differing methods of communication and collaboration within a range of organisational contexts.
2. Reflect upon their own interpersonal, communication and collaborative skills and identify areas for improvement.

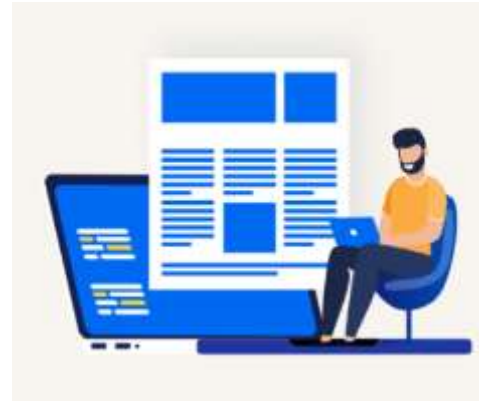

Example Structure

What is analysis?

The ability to break down material/ideas into constituent parts, showing how they relate to each other and how they are organised.

What you do when you analyse?
You:

- Inspect
- Differentiate
- Examine
- Compare
- Contrast
- Distinguish
- Relate
- Question
- Debate

1. **Post Name**
2. **Introduction** – what is this post about? (write this part once you have written everything else)
3. **Using Driscoll model: identify** key themes of the case study divided into **subheadings** linked to the communication and collaboration theories – use your analysis skills. Include **Personal reflection** in the context of your aforementioned analysis, what are the skills you need to develop as a future manager and why?
4. **Conclusion** – main take-away points
5. **Reference List** linked to the in-text citations you used in the content

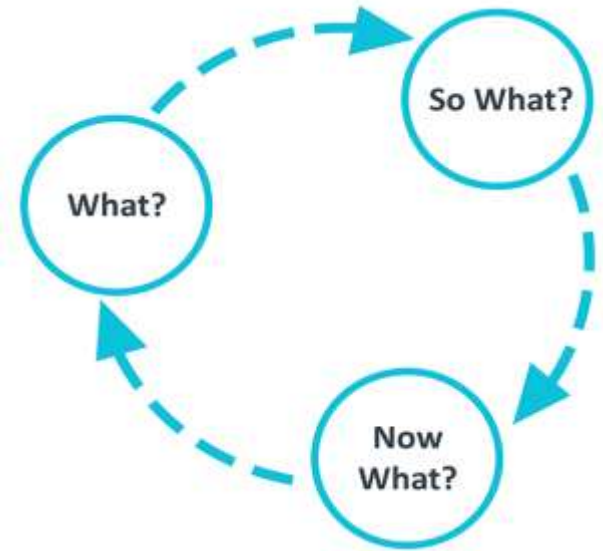

Activity – 15mins

- Read one the materials on the Post Office scandal saved on our Teams channel or Aula. What are the main themes of the case study ?
- Write 2 -3 sentences of your interpretation of each theme

Driscoll Reflective Model

- Driscoll (1994) developed this model of reflection based on the three simple questions – What? So what? Now what?
- **'What?'** helps you describe the situation you want to learn from. You should identify the facts and feelings of the situation.
- **'So What?'** allows you to extract the meaning of 'What?'. Moreover, you should question **what are the knowledge or theories that could help you make sense of the situation (LO1).**
- **'Now what?'** allows you to create an action plan for the future based on the previous questions. (LO2)

(The University of Edinburgh, 2024)

Apply Driscoll Reflective Model to your assignment (Example)

WHAT? Description of a particular event in relation to the Post Office.

The Post Office Horizon scandal involved the wrongful prosecution of over 700 sub-postmasters between 1999 and 2015 due to apparent financial discrepancies shown by the Horizon IT system. Sub-postmasters were accused of theft, fraud, and false accounting when the system showed shortfalls in their accounts, despite them insisting the errors were system-based.

Apply Driscoll Reflective Model to your assignment (Example)

So WHAT? Analyse the particular event you identified and then use Communication and Collaboration theory to analyse.

In this example we have used: Shannon and Weaver's Communication Theory

The Horizon system evidenced transmitter and channel issues, this was evident in the technical problems within the Horizon system which created noise in the communication channel. The impact / effect of the created noise was that..... (You will be expected to analyse this application of theory further and apply to the Post Office case study).

Apply Driscoll Reflective Model to your assignment (Example)

Now WHAT? Following your analysis, what have you learned as a future manager, what would you have done differently? What considerations would you implement into your own communication style and behaviours?

Upon reflection, of the Horizon systems faults. It has provided an opportunity for me to learn and consider the implementation of system management skills when implementing an I.T reliant system into organisations. In particular, it has encouraged me to recognise early warning signs of systemic problems and to maintain documentation of issues and responses.

Suggested Structure

Introduction (100 words)

- Introduce your CMI Magazine Reflective Blog.
- What are you going to be reflecting on within your blog?

Overview of your Reflective Model (50-100 words)

- What is Driscoll model
- How does this model compare with other academic reflective models?

Suggested Structure

Main Content x2 (600 words each)

What: Identify 2 key communication or collaboration challenges with Post Office & Fujitsu.

So what?: Use communication and collaboration theories to demonstrate impact and consequence of the events

Now what? What would you do differently? What have you learnt from this case study, how would you improve your own communication and collaborative behaviours on that basis?

Driscoll's Model of Reflection

What stage?

- What happened?
- What did you observe?
- What were the actions taken?
- How did you react?
- How did others react?
- What were the most surprising elements in the occurrence of the event?

1

So what?

- How did you feel during the occurrence?
- How do you feel regarding the event at this moment?
- Do you feel different regarding the situation and why?
- What were the positive aspects of this event?
- What were the negative aspects?
- What were others feeling?
- Were your experiences different from others?

2

Now what?

- What was the impact of the event on you?
- What improvements can be made to alter the outcome?
- What actions can be taken next time while dealing with the same situation?
- What information will be needed to deal with the same situation?
- How can you improve your performance in a similar situation next time?

3

Suggested Structure

Conclusion (100 words)

- What are the key takeaways from your Reflective Blog?
- Try not to introduce anything new here, and focus on a summary of your Blog.

Today's Learning Objectives

- Understand the communication process
- Appreciate the nature and importance of effective communication within and beyond organisations;
- Identify and explain various communication theories and models as well as evaluate their usefulness
- Assess your communication practices in the light of communication theory

What is communication? Why do we communicate?

What is the importance of communication in the workplace? – 5mins + Discussion

Sharing Information

Communication is the process of conveying information. It includes ideas, thoughts, feelings, and emotions. This exchange can happen in various forms.

Creating Understanding

Effective communication aims to create shared understanding. It ensures the message is received and comprehended as intended.

Building Relationships

Communication is fundamental to building and maintaining relationships. It fosters connection, trust, and mutual respect.

To trigger/motivate Action – i.e. change the behaviour or attitude of others but also to adapt oneself or change the course of action or behaviour (i.e. acting on feedback)

Source: (Eunson, 2016)

Is communication only about sending the signals out?

, empathy and
transparency

Who is this?

Christine Lagarde
President of
European Central
Bank, her
communication
conveys
conviction,
professionalism
and discipline

5mins reflection + Discussion

In Pairs, Review the quotes and analyse what they mean. i.e. Why do you think there is no consensus of what Communication is? What is 'Meaning'? Is there one 'Meaning'? Why is Communication fundamental and vital?

'There has never been agreement on what "communication" or "to communicate" means. Even in classical Latin, *communicare* meant "to share with," "to share out," "to make generally accessible" or "to discuss together" (Glare, [1968](#), p. 369)

Rosengren ([2000](#)) suggests that, above all, communication concerns the process of meaning creation: questions concerning how people create meaning psychologically, socially, and culturally; how messages are understood intellectually; and how ambiguity arises and is resolved

'Fundamental and vital to all managerial functions, communication is a means of transmitting information and making oneself understood by another or others' (Goutam, 2013: 81)

Levels of Meaning

Examples:

Literal or Referential Meaning - knowing what 'objects or 'ideas' are referred to by the spoken word

Iconic Meaning – 'Associating things through similarity leads to categorization, when non-identical objects are treated as equivalent on the basis of elements they have in common' (Sadowski, 2022)

Interactional Meaning "Meanings do not lie in words or other elements of representation but in the perceptions and cognitions each participant makes," (Glanville, 1996)

i.e. Psychological meaning "a person's subjective perception and affective reactions to segments of language" (Mandell, 1997)

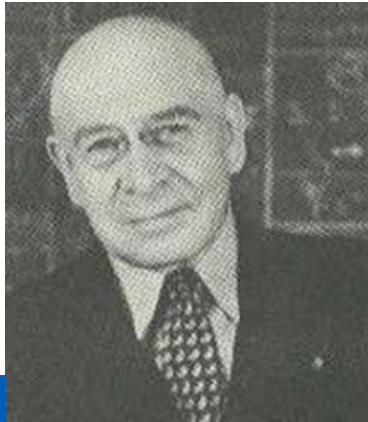

What are communication models?

Communication can often be a complex process; it's often challenging to determine where a conversation begins and ends as well as decoding the message received.

That is where models of communication come in — to simplify the process of understanding communication.

According to Denis McQuail (2010) *“a communication model is a selective representation in verbal or diagrammatic form of some aspect of the dynamic process of mass communication.”*

Models of **communication** provide us with a **visual representation of the different aspects of a communication situation.**

The map is not the territory, the word is not the thing it describes. Whenever the map is confused with the territory, a 'semantic disturbance' is set up in the organism. The disturbance continues until the limitation of the map is recognized.

— Alfred Korzybski —

How do you understand this quote?

Different types of communication models.

Linear models of communication — They only look at one-way communication.

Interactive models of communication — They analyse two-way communication.

Transactional models of communication — They illustrate two-way communication where the message gets more complex as the communication event progresses.

The Linear Communication Model

The linear model is a straightforward representation of communication as a one-way process.

This model consists of a sender who encodes a message, which is then transmitted through a channel to a receiver who decodes the message.

Linear communication models suggest that communication takes place only in **one direction**.

The main elements in these models are:

The Sender
The Receiver
The Channel

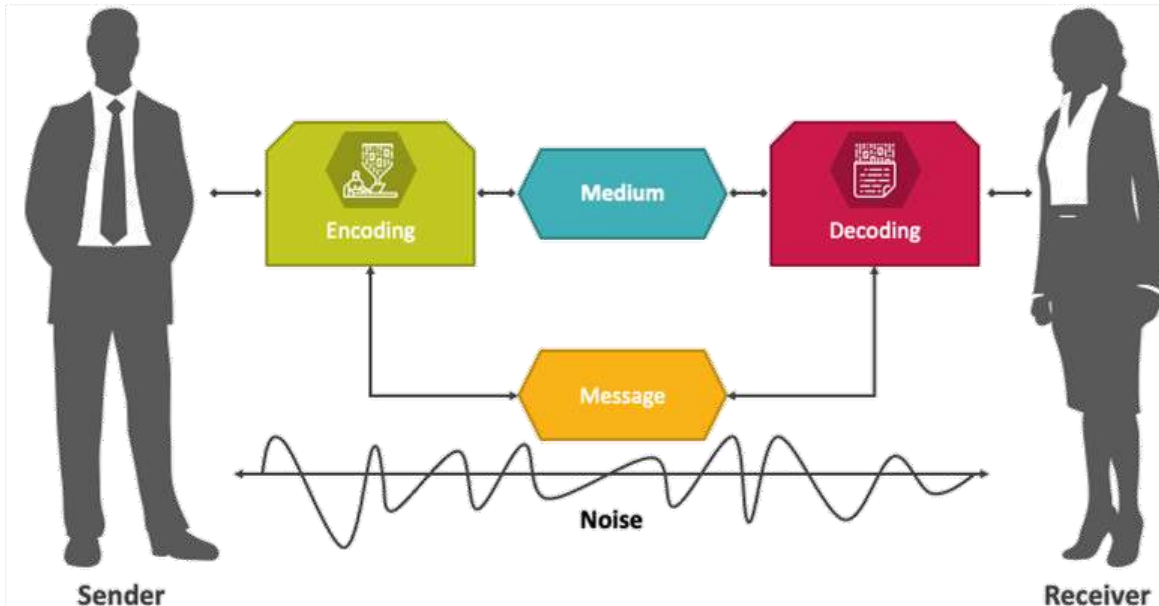

The Linear Communication Model

In this model, the sender transmits the message via a channel.

The channel, as the medium, changes the message into speech, writing, or animation.

The message reaches the receiver, who then decodes it.

Consider: Where could the Linear Communication Model be used?

1. **Mass Communication** – Television, radio broadcasts, newspapers, and online news articles.
2. **Public Speaking** – Speeches, lectures, and presentations where the audience does not interact immediately.
3. **Advertising & Marketing** – Billboards, posters, and social media ads where the message is sent without expecting a response.
4. **Educational Settings** – Recorded lessons, instructional videos, and textbooks.
5. **Corporate Communication** – Memos, emails, and reports meant to inform without direct discussion.
6. **Emergency Announcements** – Public service messages, alarms, and safety instructions.

Linear Communication in action

Linear Communication in action

One well-known business case that aligns with the **Linear Communication Model** is Coca-Cola's "Share a Coke" campaign.

This marketing initiative relied on **one-way communication** to deliver a message to a wide audience.

Why It Fits the Linear Model?

- The campaign **sent a clear, one-way message** from Coca-Cola to consumers.
- There was **no expectation of direct feedback**—the company communicated a message, and consumers received it.
- While engagement happened (e.g., people sharing their Coke bottles on social media), the **core advertising message itself was linear**—it was sent out broadly without an interactive exchange.

Outcome of the Case:

- The campaign increased sales in more than 80 countries and became one of Coca-Cola's most successful marketing strategies.
- It reinforced brand engagement while relying on a simple, one-way communication model to deliver a clear and persuasive message.

Benefits and Limitations of Linear Communication?

In pairs take a couple of minutes and then write on a board

Benefits

Easy to understand and describes the communication process thoroughly.

It is straightforward and targeted to specific audiences.

Minimises miscommunication and edits, as receivers can't change the information they're receiving.

Allows for quick transmission and message control, as senders don't have to wait for a response.

Reduces noise interference and improves clarity, as there is only one channel and one direction of communication

Limitations

Assumes that communication is a straightforward, one-way process where the sender encodes and the receiver decodes the message.

Does not account for feedback, noise, and context that can affect the meaning and effectiveness of communication.

Often less relevant to electronic communication and internet where the roles of sender and receiver are not clear.

Not a dynamic way of communicating that allows for interaction and adaptation.

Aristotle's communication model

The oldest communication model that dates back to 300 BC, Aristotle's model was designed to examine how to become a better and more persuasive communicator.

Aristotle's model of communication primarily focuses on **the sender** (public speaker, professor) who passes on their message to **the receiver** (the audience).

The sender is the only active member in this model, whereas the audience is passive.

This makes Aristotle's communication model a foolproof way to excel in public speaking, seminars, and lectures, and sits perfectly in a Linear Communication Model approach.

Raphael 'The School of Athens' 1511

Aristotle's communication model

#1 The Speaker

The speaker is the person who is delivering the message. In this model, the speaker is responsible for creating and delivering the message effectively. This includes not only the words used but also the delivery style, tone, and body language.

#2 The Audience

The audience is the group of people who receive the message. In this model, the audience is considered an essential part of the communication process. The speaker needs to understand the audience's needs, interests, beliefs, and values to effectively communicate the message.

#3 The Message

The message is the content of what is being communicated. In this model, the message should be clear, concise, and persuasive. The message should be crafted with the audience in mind to ensure that it is relevant and engaging.

Aristotle's model of communication is important because it seems plausible and valid even in our modern lives.

Main elements of Aristotle's communication model

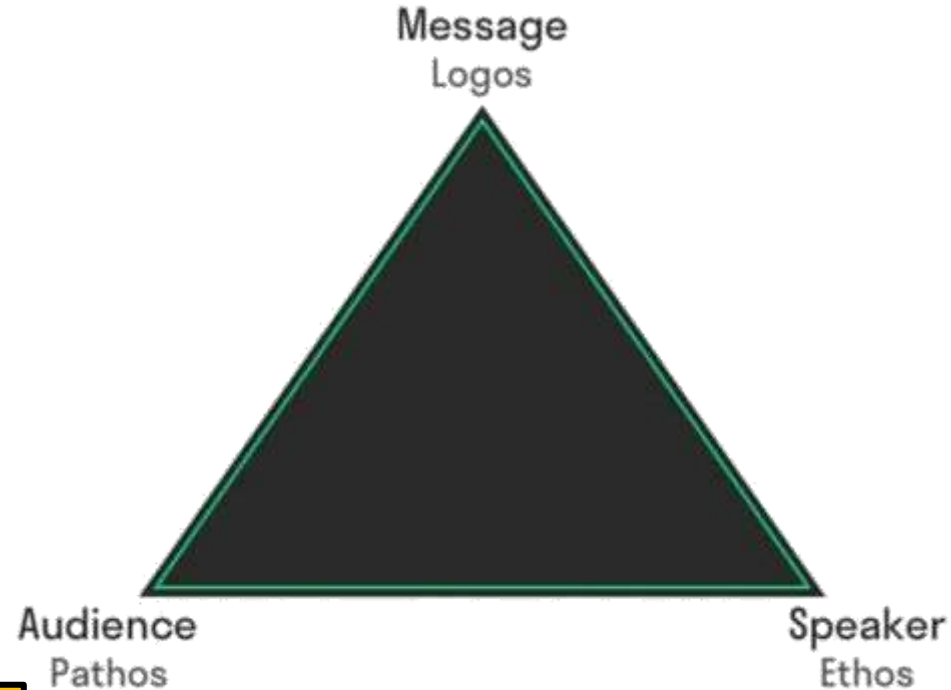

Aristotle identified 3 elements that improve communication within this model:

Ethos — Defines the credibility and ethical appeal of the speaker. Speaker gains credibility, authority, and power by being an expert in a field of their choice.

Pathos — Connects the speaker with the audience through different emotions (anger, sadness, happiness.) Can evoke emotions in the audience.

Logos — Signifies logic. Namely, it is not enough for the speech to be interesting — it needs to follow the rules of logic.

Investigate why each element is required to improve communication.

Ethos

Ethos is essentially the speaker's **credibility** to talk about the subject that he or she is talking about and discusses it openly, with certainty.

What Aristotle means by ethos is the **process of the speaker establishing their credibility** or knowledge about the subject.

That can simply be done by mentioning the area of expertise he had majored in, but it can also be done by demonstrating his ability to **back up his arguments**.

Credibility can also be built by using **evidence, citing sources, or drawing on the speaker's own experience or expertise**. That's why having empirical data to back up your arguments with clear proof is essential for this point.

What this does to an audience is create an image of the speaker as someone who knows what they are talking about and as someone that they can easily rely on and trust.

Francesco Hayez 'Aristotle painting' 1811

Consider Ethos when writing your assignments!

Pathos

Pathos is essentially the speaker establishing an **emotional connection with the audience**.

The idea behind Pathos is that the audience must feel that they are being communicated with and interconnected with the presenter. Emotional bonds will make the listeners fascinated, and they feel the speaker is “one of them.” This focuses on engaging the audience’s emotions and creating a connection with them in order to persuade or influence their attitudes, beliefs, or behaviours.

Pathos can be conveyed through various elements of communication, such as tone of voice, facial expressions, body language, and the use of vivid language and imagery. In order to effectively use pathos in communication, Aristotle suggested that speakers should have a deep understanding of their audience and their emotional state.

By appealing to their emotions and creating a connection with them, speakers can make their message more memorable and impactful.

Logos

Logos refers to the **logical or rational** appeal of a message. This element focuses on the substance of the message and how it is presented to the audience.

Logos can be seen as the **argument or reasoning behind** a message, and it is often used to appeal to the audience's sense of logic or reason. While ethos refers to the credibility or trustworthiness of the speaker or source of the message, and pathos refers to the emotional appeal in a message, logos focuses on the logical appeal and the argumentative structure of the message itself.

In order to effectively use logos in communication, Aristotle suggested that speakers should use clear and **logical arguments, present evidence or facts to support their claims**, and **use reasoning to connect their ideas and persuade their audience**.

By appealing to the audience's sense of logic and reason, speakers can create a persuasive message that is grounded in substance and can effectively influence their audience.

Example: Apple's iPhone Launch Events (Using Aristotle's Communication Model)

Apple is a great example of a company that uses **Aristotle's Communication Model** to persuade and influence its customers.

Components of Aristotle's Model in Apple's iPhone Product Launch

Launch Speaker (Sender) → Apple's CEO and product designers

Message → Introduction of the latest iPhone with new features

Audience (Receiver) → Apple customers, tech enthusiasts, media, and investors

Apple carefully **crafts its message** to build excitement and convince customers to buy the latest iPhone.

How is Aristotle's Ethos, Pathos & Logos model applied?

Aristotle's communication model

Aristotle suggested that we look at 5 components of a communication situation to analyse the best way to communicate:

Speaker
Speech
Occasion
Target audience
Effect

Aristotle advises speakers to build speech for different audience on different time (occasion) and for different effects.

The speaker must prepare his speech and analysis audience needs before he enters into the stage. His words should influence in audience mind and persuade their thoughts towards him.

SPEAKER

SPEECH

OCCASION

AUDIENCE

EFFECT

Apply Aristotle's communication model with your partner on a subject of your choosing. 15mins

✓ **Ethos (Credibility)** – Establishing trust and authority Apple positions itself as a market leader in innovation. The CEO and senior designers showcase their expertise and knowledge. Apple highlights its track record of quality products.

Remember to structure your discussion using the following:

Ethos — Defines the credibility of the speaker. Speaker gains credibility, authority, and power by being an expert in a field of their choice.

Pathos — Connects the speaker with the audience through different emotions (anger, sadness, happiness.)

Logos — Signifies logic. Namely, it is not enough for the speech to be interesting — it needs to follow the rules of logic.

✓ **Pathos (Emotion)** – Creating excitement and emotional connection. Apple tells stories about how the new iPhone improves users' lives. They use cinematic videos, music, and visuals to evoke excitement.

✓ **Logos (Logic & Reasoning)** – Providing facts and technical superiority. Apple demonstrates product improvements with data and comparisons. They showcase technical specs, such as battery life, processing power, and camera advancements.

Activity – for tomorrow 11 March 2025

Shannon

Weaver

1. Shannon and Weaver Communication Model (1949)
2. Harold Laswell's Model of Communication (1948)
3. Osgood-Schramm's Circular Communication Model
4. Berlo's Communications Model
5. Cheris Kramarae Muted Group in Communication (1971)
6. Adair's Communication Star (1955)

Research & explain the theory, what are the most significant elements of this theory, what are the limitations of this theory? Provide the title and year of the work where we can find this theory

Laswell

Schramm

Berlo
