## Lesson Starter (Communication Game)

Webster's Dictionary defines communication as "the imparting or interchange of thoughts, opinions, or information by speech, writing, or signs."

Aim: Assess if the communication message has accurately been past down the chain! (A broken telephone test but through non-verbal communication)

- 1) Your tutor, will display the video on the next slide. This will help you understand the task at hand (On the next slide).
- 2) Your tutor, will ask for 5-10 volunteers from the class to assist
- 3) Let's see how well we communicate

# Communication Game

” It is important to consider that communication is not just verbal in form. One study states that 93 percent of communication is more affected by body language, attitude, and tone, leaving only 7 percent of the meaning and intent based on the actual words. (O’Daniel & Rosenstein, 2020)

## Reflection:

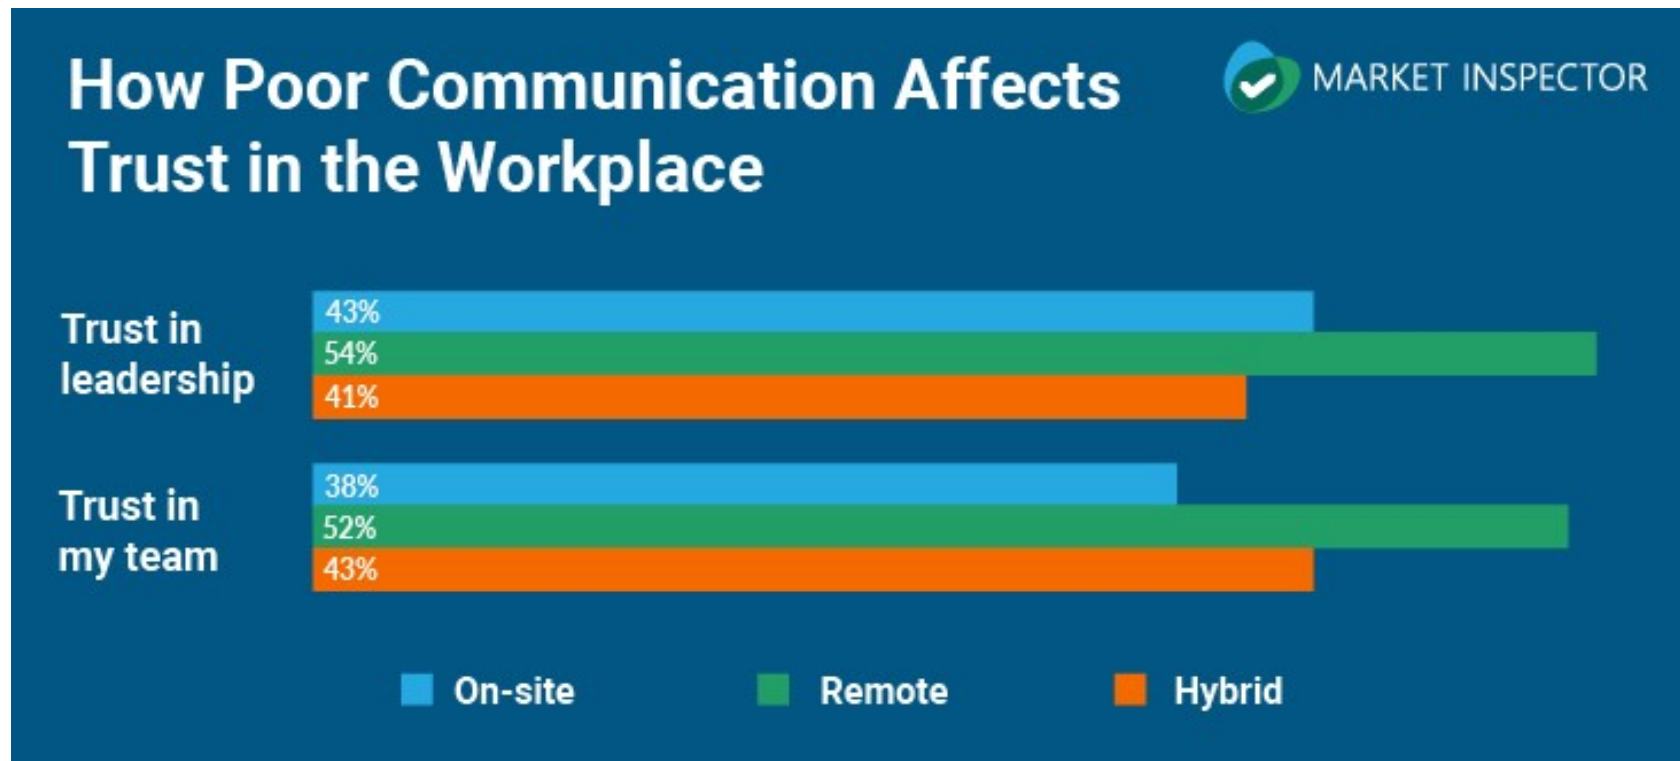

Take an opportunity to reflect on this task.

Can you link your discussion to any key theory (LO1) or reflect own interpersonal communication skills (LO2)

## Organisations where communication and collaboration has FAILED!

- ❑ **75%** of Cross-Functional Teams Are Dysfunctional (Tabrizi, 2015)
- ❑ According to Forbes, over **40%** of workers experience a decline in trust towards leadership and their team when communication is lacking. (Hoory, 2023)
- ❑ **86%** of employees and executives cite the lack of effective collaboration and communication as the main causes of workplace failures (Communication in the Workplace Statistics 2024)

## Consequence of Poor Communication

(Workplace Communication Statistics: 2024)

# Consequence of Poor Communication

## ▪ Employee Burnout and Diminished Performance

Studies from Deloitte reveal that over three-quarters of professionals (77%) experience burnout in their current roles. With 91% of workers reporting that unmanageable stress impacts their work quality, the consequences are severe. This toxic combination leads to decreased productivity, higher rates of sick leave, and significant health concerns among employees.

<https://www2.deloitte.com/us/en/pages/about-deloitte/articles/burnout-survey.html>

## ▪ Operational Inefficiencies and Team Dysfunction

Gallup's research highlights how unclear objectives and poor communication create a cascade of workplace issues. Without proper communication channels, employees struggle to participate effectively in projects, often leading to redundant work and missed deadlines. Perhaps most concerning, only 7% of employees strongly believe their workplace communication is accurate, timely, and transparent – a statistic that reveals the depth of this problem.

<https://www.gallup.com/workplace/insights.aspx>

## ▪ Financial losses

The financial implications of poor communication are staggering. Grammarly's 2023 analysis shows that communication breakdowns cost businesses approximately £11,560 (\$12,506) per employee annually. Beyond direct costs, 20% of organisations report damage to their brand reputation due to poor communication, with 19% losing potential business deals as a result.

<https://go.grammarly.com/state-of-business-communication-report-2023>

*(Workplace Communication Statistics: 2024)*

## CASE STUDY TASK

### NHS – Organisation where communication has failed

#### A quick glance:

- Every 36 hours a million contacts are made between patients and healthcare staff in the NHS and each of these is likely to generate further communication between staff. Yet failings in that communication are a common finding (NHS England, 2022)
- Our report's polling from autumn 2023 found that 55 per cent of the public report experiences of poor communication from the NHS in the last five years, rising to 61 per cent of women (*NHS Communication Problems: "We're at the Mercy of a System That Doesn't Work,"* 2024)
- 34.31% of NHS Nursing and Healthcare Assistants staff in the UK, felt unwell due to work related stress during the last 12 months as of 2023 (Statista, 2023)

# Case Study - Task

## 30 minute - small group task

### 1) Research communication failings in the NHS.

- What is going wrong and why?
- Can you link this to any communication theory you have learnt in previous lessons? (LO1)

### 2) Consider how these failings are impacting the NHS and their key stakeholders of Employee's and Patients/Public?

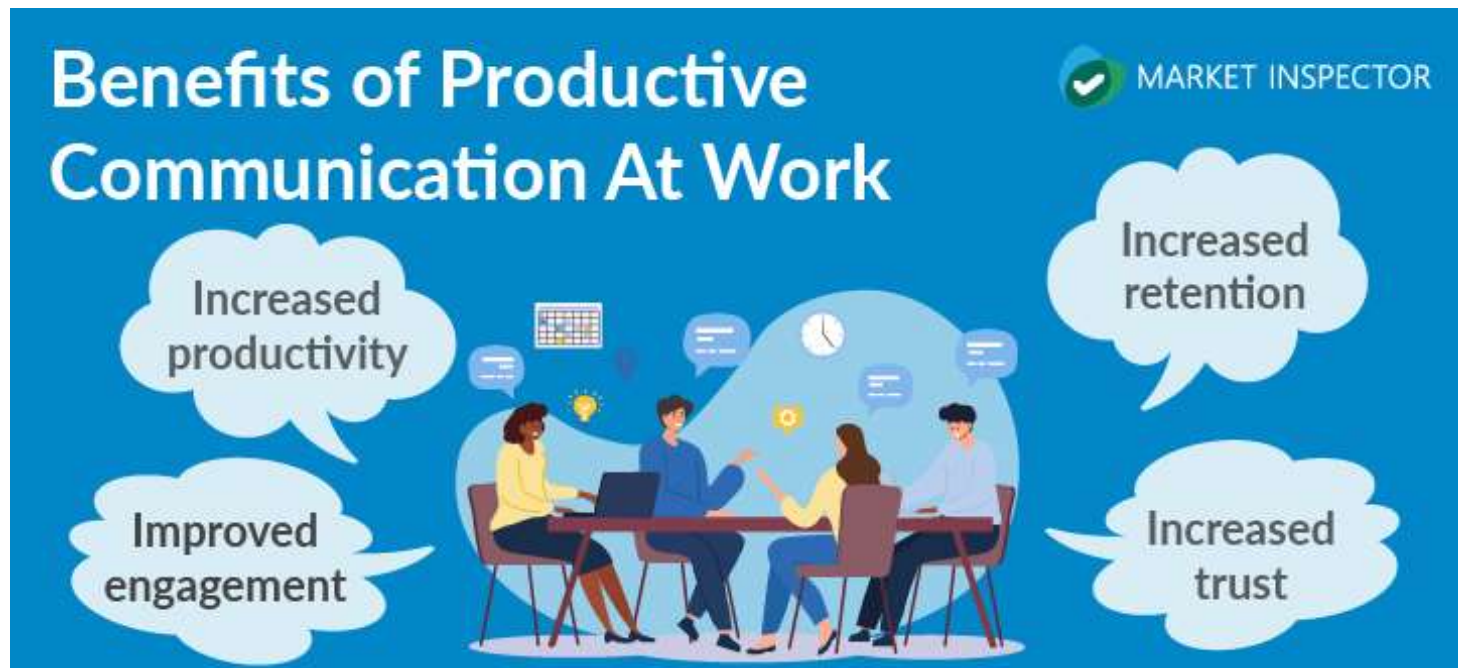

- Hint// Consider the consequences of poor communication we explored on the previous slides

### 3) Reflection

- If you were senior manager in the NHS reflecting on this information. What will you do to improve the NHS communication issues?

**Be prepared to share your finding and thoughts with your class/tutor**

# Organisations where communication and collaboration is SUCCESSFUL!

*(Workplace Communication Statistics: 2024)*

# Benefits of Communication

## ✓ Enhanced Team Performance and Productivity

The power of effective communication is clear with 72% of organisational leaders report that strong communication directly boosts their team's productivity.

McKinsey's research reinforces this, showing that well-connected teams achieve 20-25% higher productivity levels. Even more compelling, organizations with robust communication strategies demonstrate performance levels 3.5 times higher than their competitors.

## ✓ Strengthened Employee Engagement and Trust

Clear communication creates a ripple effect throughout an organisation, elevating employee productivity, engagement, retention, and trust levels.

Gallup's research reveals a striking insight: managers account for 70% of the variance between high-performing and average workplaces through their communication practices.

*(Workplace Communication Statistics: 2024)*

# Benefits of Communication

## ✓ Improvements in Employee Retention

The impact of effective communication on retention is remarkable - ZenHR's research shows organizations with strong communication strategies retain employees 4.5 times more effectively than those without. (ZenHR, 2022)

The key to retaining top talent lies in maintaining consistent, transparent communication that acknowledges contributions while promoting healthy work-life boundaries.

## ✓ Building Trust and Organisational Success

MIT Sloan's research reveals the transformative power of trust in the workplace: employees who trust their organization are 260% more motivated, 40% more productive, and demonstrate 41% lower turnover rates. (Reichheld & Dunlop, 2023)

Effective communication serves as the foundation for building trust, which in turn drives significant improvements across all key performance metrics - from productivity and engagement to retention and overall organizational success.

## CASE STUDY TASK

### Organisations where communication is **SUCCESSFUL**

#### A quick glance:

Stagecoach implemented a mobile employee app to enhance internal communication and employee engagement. This app was aimed to communicate better with their 30,000 customer-facing workforce.

**Takeaway:** Stagecoach reported a 32% increase in employee satisfaction

**Perhaps you may want to explore this case further in your group task**

## CASE STUDY TASK

### Organisations where communication is **SUCCESSFUL**

#### A quick glance:

Amazon employees dole out internal communication into, snack-sized bites. No long memos or long-winded email chains.

The 'comms' team knows most people will stop reading any message after over 100 words.

**Takeaway from Amazon:** Employees get clear and concise information they need and no more!

*Perhaps you may want to explore this case further in your group task*

## CASE STUDY TASK

### Organisations where communication is **SUCCESSFUL**

#### A quick glance:

Royal London was looking for improved way to gather and then act on feedback from customers, employees, and managers.

The takeaway from this Royal London Example: Giving your workforce a voice can pay off big time. Employees whose voice is heard in the office are 4.6x times likely to give their best professionally.

*Perhaps you may want to explore this case further in your group task*

# Case Study - Task

## 30 minute - small group task

1) Research communication success in an organisation of your choice (You may want to explore 3 business examples above further or any other).

- What is going right and why?
- Can you link this to any communication theory you have learnt in previous lessons? (LO1)

2) Consider how these successes are impacting the and their key stakeholders?

- **Hint//** Consider the positive impact of good communication we explored on the previous slides

3) Reflection

- Personally reflect on what you have learnt above, how would this aid your practice a manager in the future.

**Be prepared to share your finding and thoughts with your class/tutor**

## Common Barriers to Interprofessional Communication and Collaboration

### 10 minute - individual task

On the next slide, you will have 16 labelled common barriers to communication and collaboration.

**SELECT ONE** and brainstorm a few ideas as how this may impact communication

**THEN**, reflect and consider how as a future manager you will deal with overcoming this barrier

**Be prepared to share your findings and thoughts with your class/tutor**

## Common Barriers to Interprofessional Communication and Collaboration

|                                                     |                                                                               |                                                           |                                                              |
|-----------------------------------------------------|-------------------------------------------------------------------------------|-----------------------------------------------------------|--------------------------------------------------------------|
| Personal values and expectations                    | Personality differences                                                       | Hierarchy                                                 | Disruptive behaviour                                         |
| Culture and ethnicity                               | Generational differences                                                      | Gender                                                    | Historical interprofessional and intraprofessional rivalries |
| Differences in language and jargon                  | Differences in schedules and professional routines                            | Varying levels of preparation, qualifications, and status | Fears of diluted professional identity                       |
| Differences in accountability, payment, and rewards | Differences in requirements, regulations, and norms of professional education | Concerns regarding clinical responsibility                | Emphasis on rapid decision making                            |
