

Management & Leadership Perspectives
WEEK 2 – Management Theories

Ewa Carr-de Avelon

Our high-level plan for the next 6 weeks

2	16.09.	DAY 1	Management Theory - Key theories and perspectives of leadership and management
	17.09.	DAY 2	
	18.09.	DAY 3	
	19.09.	POST	
	20.09.	PRE	
3	23.09.	DAY 1	Management in Practice - Leadership Styles
	24.09.	DAY 2	
	25.09.	DAY 3	
	26.09.	POST	
	27.09.	PRE	
4	30.09.	DAY 1	Delivering Change
	1.10.	DAY 2	
	2.10.	DAY 3	
	3.10.	POST	
	4.10.	PRE	
5	7.10.	DAY 1	Motivation and Team Working
	8.10.	DAY 2	
	9.10.	DAY 3	
	10.10.	POST	
	11.10.	PRE	
6	14.10.	DAY 1	Working with Stakeholders
	15.10.	DAY 2	
	16.10.	DAY 3	
	17.10.	POST	
	18.10.	PRE	

Methods:

- Group work
- Oxford Debates
- Case Studies
- Simulations
- Study visit(s)
- Guest Speakers
- Workshops
- Quizzes

Starting with the end in mind. “Management & Leadership Perspectives”

1. Write a report reflecting on the historical debate about the role of Management and Leadership from the Streaming services Industry.

Assignment Due: Friday 27th September 2024 at 18:00 BST

Word Count (or equivalent): 1,000 words (+/- 10%)

2. Write a Case Study on two Streaming services companies operating in the UK and compare the impact of leadership on these organisations.

Assignment Due: Friday 18th October 2024 at 18:00 BST

Word Count (or equivalent): 2,000 words (+/- 10%)

Assignment Type: Case Study Report

Objectives of Week 2:

- Understand management theories beyond the Classical View
- Getting ready for the first essay due next week (Sept. 26th)
- Asking questions & having fun

Quote of the Week

The greatest leader is not necessarily the one who does the greatest things.

He is the one that gets people to do the greatest things.

Ronald Reagan

DAY 1 - Management Theories
Ewa Carr-de Avelon

Agenda – Day 1

- Behavioural Theories: Theory X and Y
- Your Day at the “*Golden Brew & Crumble*” Café
- Great Man Theory: Are leaders born or made?
- *Trait Theories - 4 Capitals - postponed*

BEHAVIOURAL THEORY X Y

This theories were popularized by **Douglas McGregor** back in the 1960s. They are stressing tension between two different approaches to management:

X says, that employees are inherently lazy, require constant supervision, and thrive under strict control.

In contrast, Y believes that people are self-motivated, seek responsibility, and perform well when given autonomy.

GROUP TASK

ONE DAY AT THE “*GOLDEN BREW & CRUMBLE*” CAFÉ

Behavioural Theories: Theory X and Y

GROUP TASK

Your table visits the Golden Brew & Crumble café. It is a very successful company which sells top quality coffee products and luxurious hand-made cookies.

During your visit, you come across many different statements about the management style and leadership practices, coming from 2 various managers in the company: Xavier and Yulia.

You do not know for sure, who said what, but you notice some patterns, and features that seem to go together. You decide to group similar statements into two categories: X and Y. When unsure, you put the statement aside (“someone else”)

Theory X or Xavier ¹⁾

- In my view: Employees often perceive work as a necessary chore rather than a source of fulfilment.
- From what I've observed: Many team members hesitate to take initiative; they prefer clear instructions.
- It's my conviction: Strict supervision and micro-management are essential to maintain productivity.
- Based on my experience: Creativity tends to be stifled in environments where adherence to rules is paramount.
- What I've come to believe: Financial incentives play a significant role in motivating employees.
- I'm convinced: Hierarchical decision-making ensures efficiency.
- I've noticed: When things go wrong, blame often falls squarely on individual shoulders.
- It seems to me: Change is met with resistance; familiarity provides comfort.
- In my opinion: Trust isn't freely given; it's earned through consistent performance.
- As I see it: Employee development sometimes takes a back seat to immediate tasks.

1) Worth noting: In this exercise, the approaches are represented as Yulia and Xavier for illustrative purposes only. There is no definitive or conclusive scientific evidence that these management styles are intrinsically tied to gender.

Theory Y or Yulia ¹⁾

- From my perspective: Given the right conditions, employees willingly embrace responsibility.
- What strikes me: Intrinsic motivation drives people to seek self-fulfilment through their work.
- I've come to understand: Creativity flourishes when employees are encouraged to think beyond the obvious.
- Observing closely: Adaptability is a hallmark of engaged and motivated team members.
- It's clear to me: Managers who prioritize development create a positive work environment.
- In my interactions: Collaboration and teamwork lead to better outcomes.
- I firmly believe: Trust empowers employees to make decisions autonomously.
- My experience tells me: Positive feedback fuels motivation and commitment.
- What resonates with me: Fulfilling higher-level needs (esteem, self-actualization) drives performance.
- As I've seen: Shared decision-making fosters ownership and commitment.

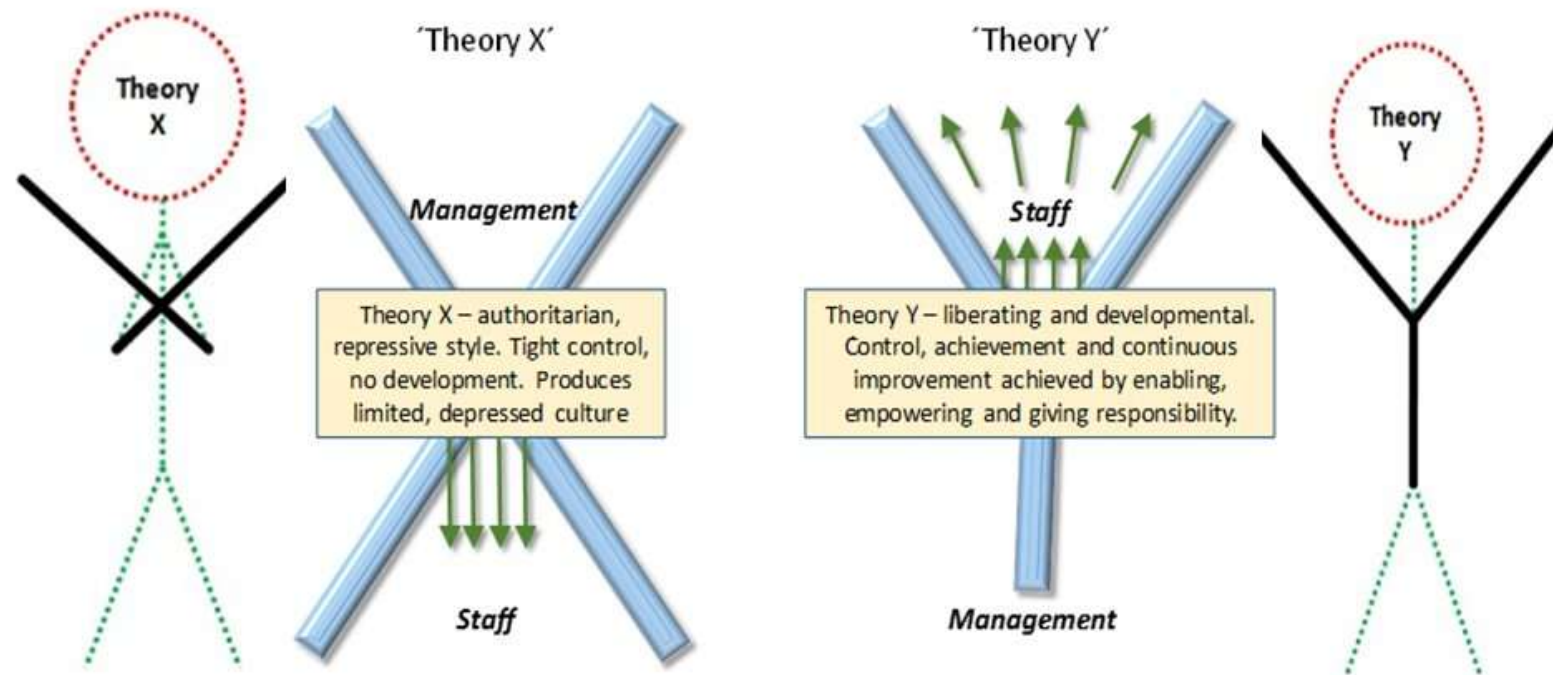

1) Worth noting: In this exercise, the approaches are represented as Yulia and Xavier for illustrative purposes only. There is no definitive or conclusive scientific evidence that these management styles are intrinsically tied to gender.

Coocoo's' eggs

- “In my experience, Cross-Functional Teams Drive Innovation”: Collaborating across departments sparks creativity and fresh ideas.
- “From my perspective, Remote Work Enhances Flexibility”: Working from home allows me to balance life and work effectively.
- “In my view, Work-Life Integration Matters Most”: It’s about blending work and personal life seamlessly.
- “What I’ve come to believe is that Learning Agility Is Vital”: Adapting to new challenges ensures long-term success.
- In my opinion, that first sip of a perfectly brewed coffee feels like a warm embrace—it jumpstarts the day.
- What I’ve Come to Believe is that a delicate macaron or a gooey brownie mark a moment of joy for every employee.
- Somehow, ideas flow better with that steaming cup in hand... Caffeine-fuelled inspiration, perhaps?
- I think, that a cookie shared over heartfelt conversation can heal even the toughest days.
- Observing closely: Coffee and Sweets Create Bonding Rituals. They’re the companions of laughter, late-night chats, and stolen moments.

Behavioural Approach – Theory X and Y

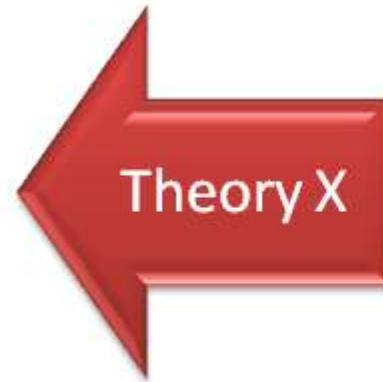

The environment or industry can have a strong influence on whether a manager adopts theory X or theory Y.

High-stress, high-control environments (e.g., military, manufacturing) might encourage more theory X behaviors, regardless of the manager's gender.

In more collaborative, innovative, or knowledge-based industries, theory Y behaviors may be more common for both male and female managers.

Behavioural Approach – Theory X and Y

Attitude

We dislike work, find it boring, and will avoid it if we can.

We need to work and want to take an interest in it. Under the right conditions, we can enjoy it.

Direction

We must be forced or coerced to make the right effort.

We will direct ourselves towards a target that we accept.

Responsibility

We would rather be directed than accept responsibility, which we avoid.

We will seek and accept responsibility, under the right conditions.

Motivation

We are motivated mainly by money and fears about their job security.

Under the right conditions, we are motivated by the desire to realize our own potential.

Creativity

Most of us have little creativity – except when it comes to getting around rules.

We are highly creative creatures – but are rarely recognized as such or given the opportunity to be.

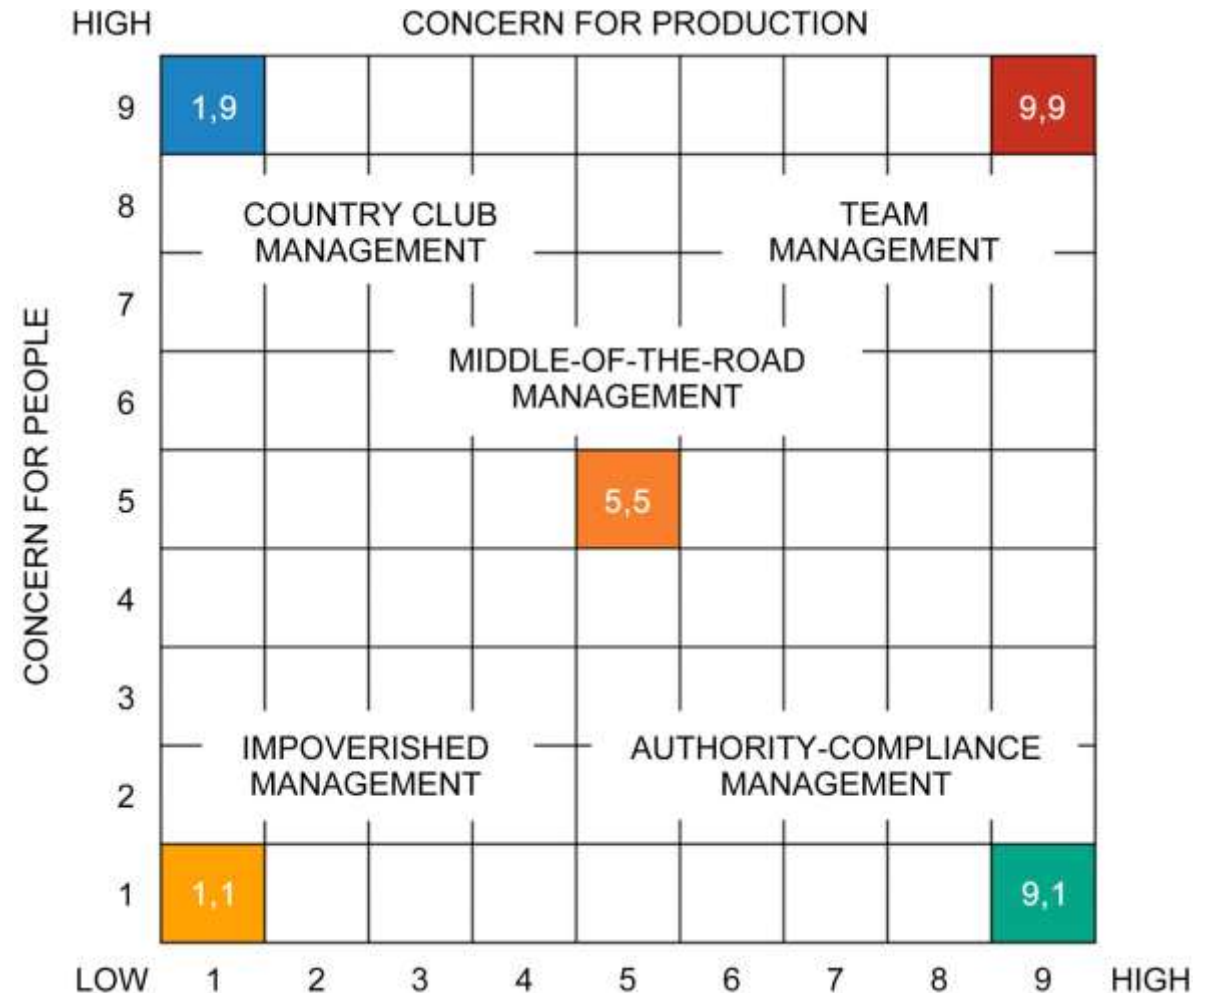

Concerns for people versus concern for production

– Theory X and Y in real life

- When is X a better approach than Y? Why?
- What happens if there is not enough Y?
- What happens if there is too much Y?

The managerial grid model or managerial grid theory (1964) is a model, developed by Robert R. Blake and Jane Mouton, of leadership styles.

GREAT MAN THEORY

“Great Man” propose that exceptional leaders are born with inherent qualities such as charisma, confidence, and intelligence.

These leaders rise to prominence when needed, often portrayed as heroic figures.

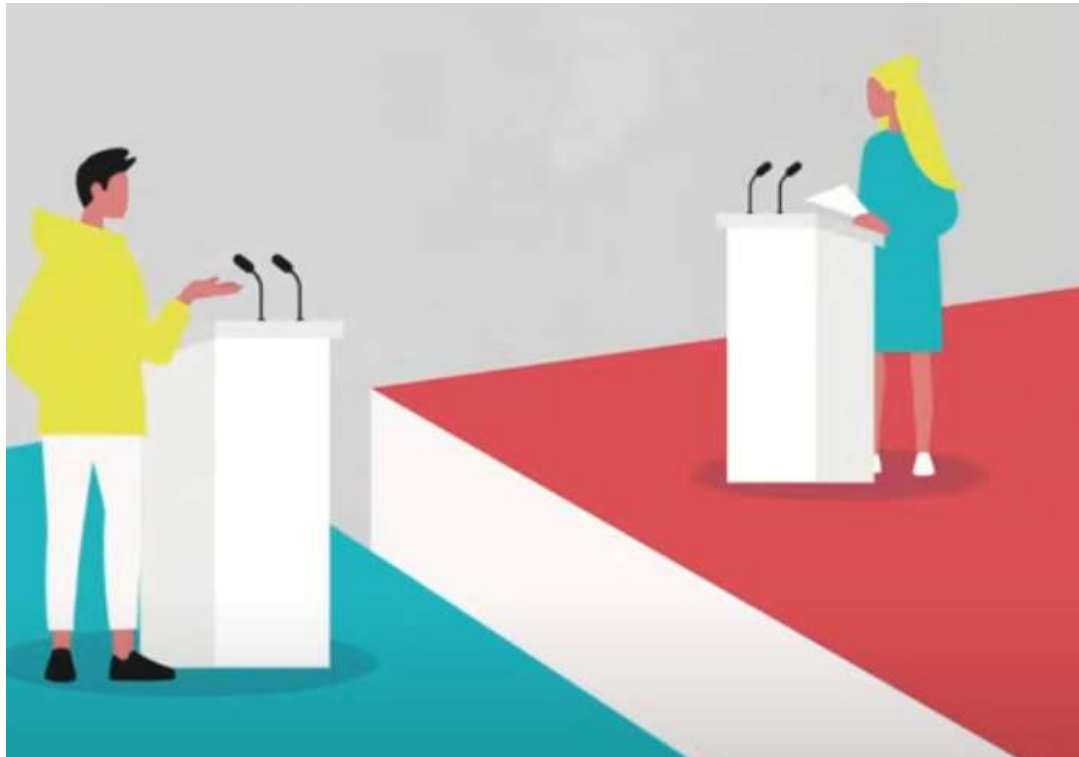

The Great Man Theory

<https://www.youtube.com/watch?v=8GL9EfM3AIk>

Oxford Debate: Are great leaders born or made?

- 2 teams to argue one of the views: Born vs. Made
- 4 disputants in each team (random selection)
- 3 rounds per team: 1 minute speech + 5 minutes for challenging questions
- Audience voting for the winner by changing their seats

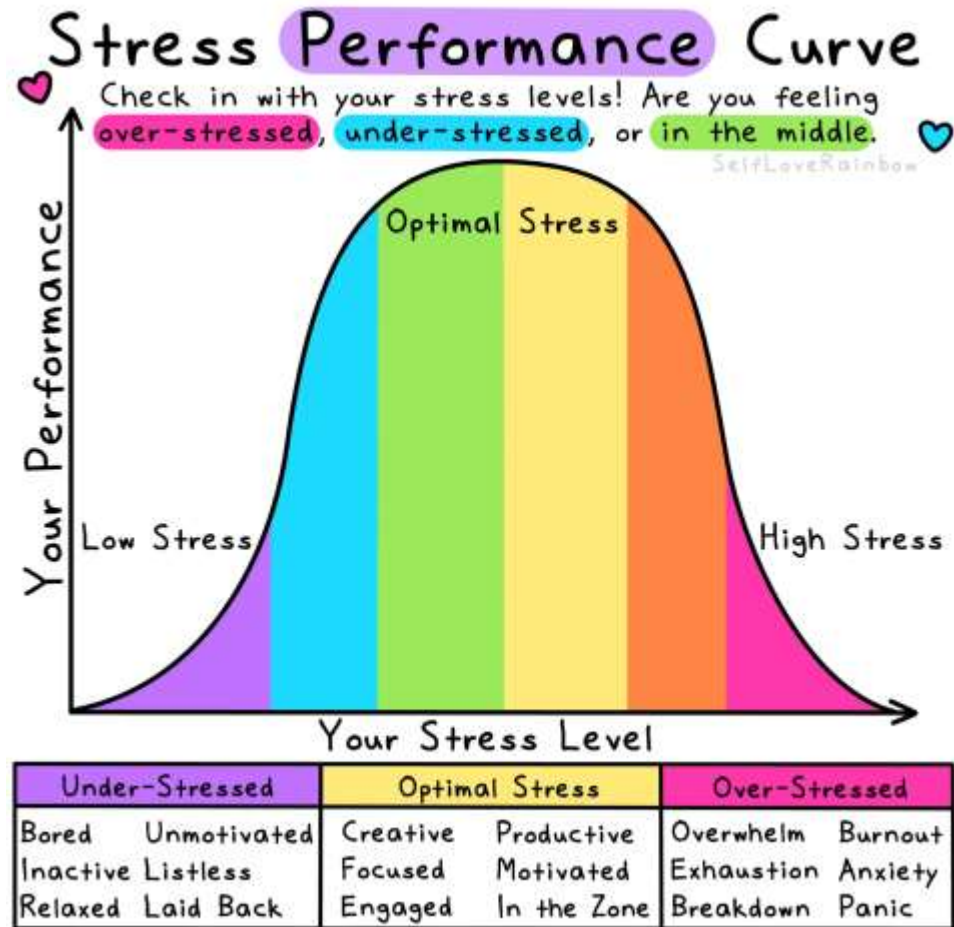

<https://www.youtube.com/watch?v=1TSkkxu8on0&list=PPSV>

Simon Sinek: To become a leader, you must want to be one

<https://www.youtube.com/watch?v=-uQpCF6bfmQ&list=PPSV>

To grow, one needs to leave the comfort zone

Leader's job is to outstretch employees to keep them sharp

DAY 2 - Management Theories

Ewa Carr-de Avelon

CRISIS MODE

On-line study

Agenda – Day 2

- Our way around now – crisis management
- Trait theories – Stephen Covey's Personal Credibility diagram
- Situational Theories - Ken Blanchard
- Quiz: Facts and myths about management – postponed
- Homework: Reading & watching

TRAIT THEORIES

Trait theories focus on identifying specific personality traits that distinguish effective leaders.

While early research emphasized innate traits, more recent views recognize that leadership effectiveness depends on a combination of traits, skills, and situational context.

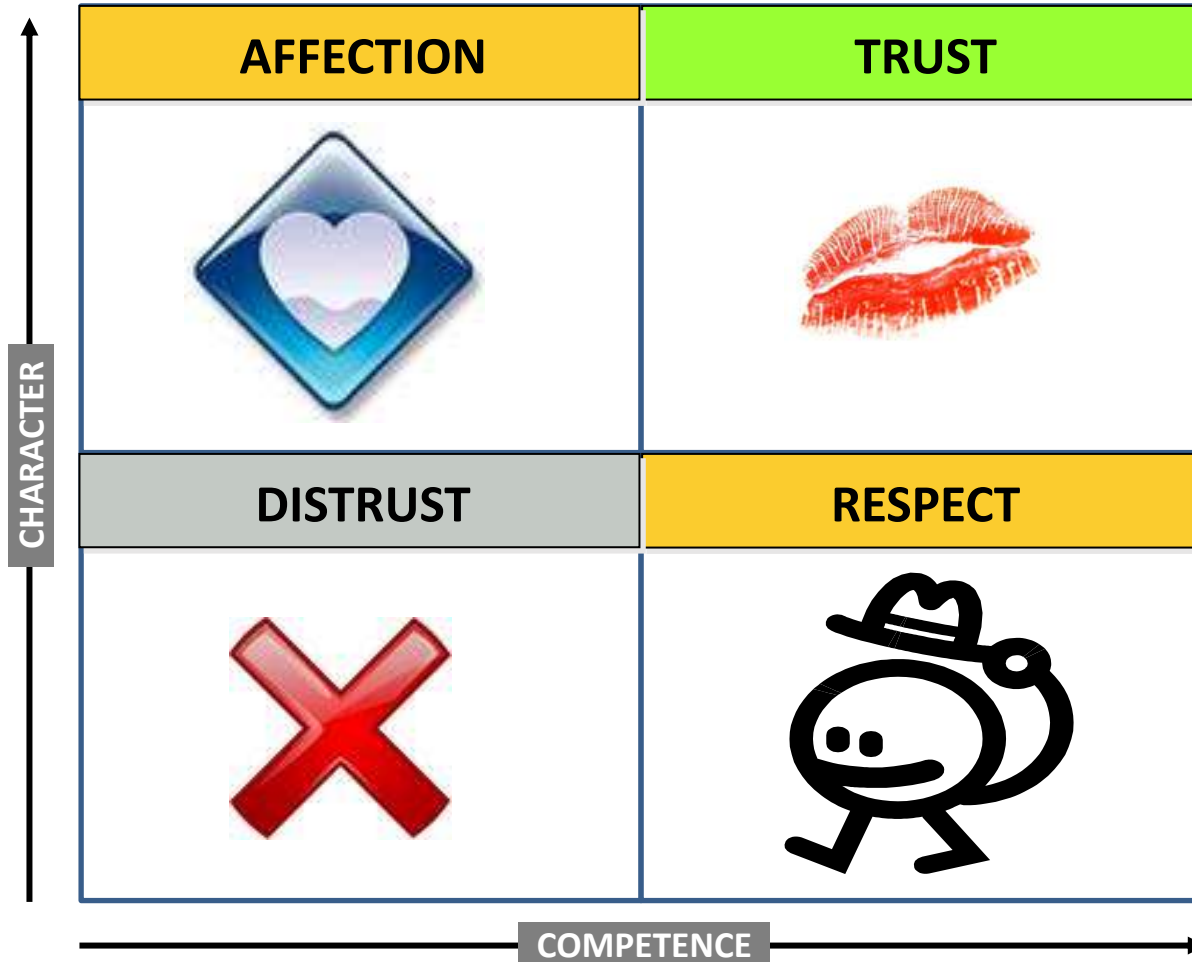

Trust is a function of two things:
character and competence. Character
includes your integrity, your motive and
your intent with people. Competence
includes your capabilities, your skills, and
your track record. Both are vital.

— Stephen Covey —

AZ QUOTES

Covey's Personal Credibility diagram

Competence – the possession of knowledge and skills required to complete a task
Can be learned

Character – integrity, motive and intent with people
Cannot be learned,
is a matter of personal decision

The Speed of Trust https://youtu.be/3Q-FgigaF9w?si=t5hsai_wEP-ocsgR

SITUATIONAL LEADERSHIP

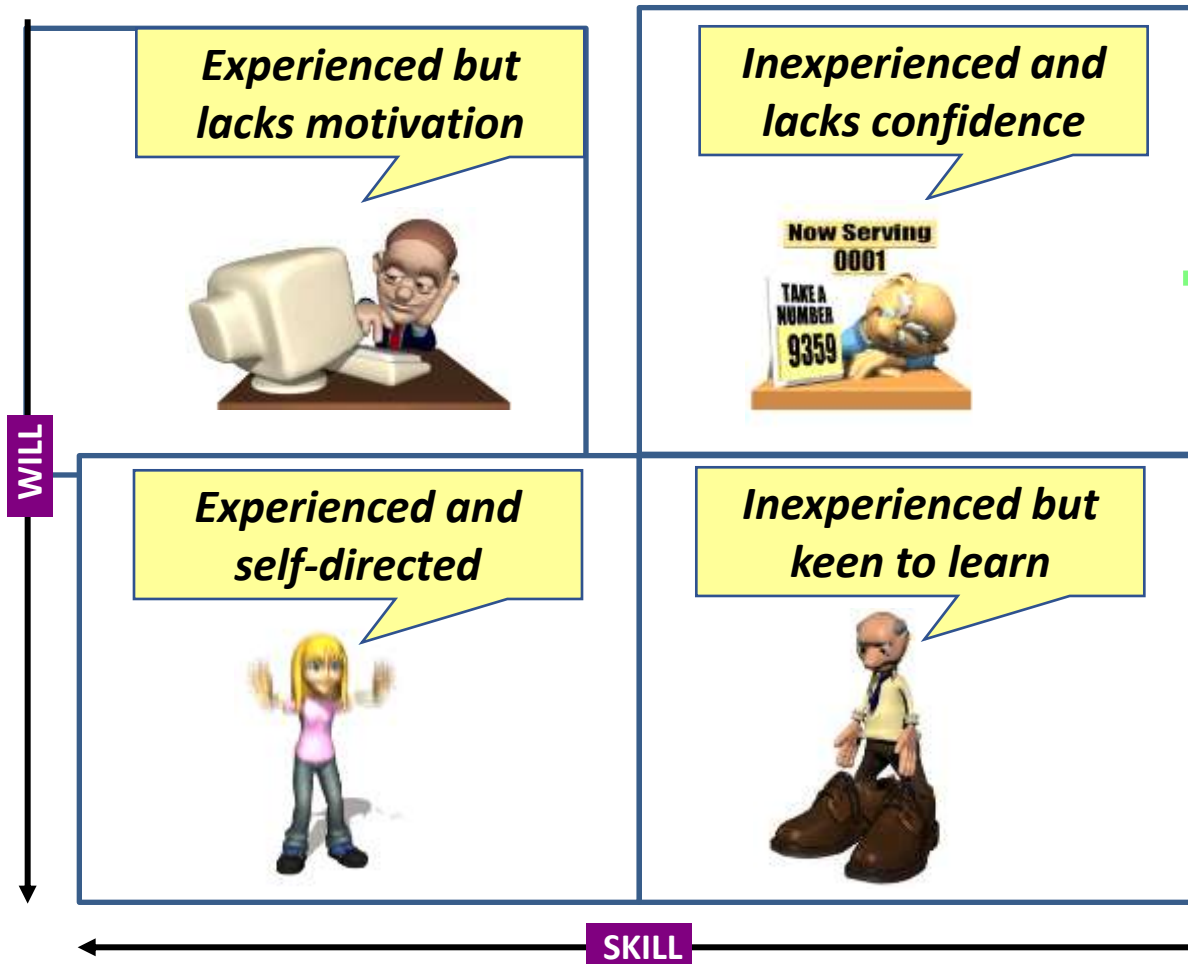

Situational theories propose that effective leadership depends on adapting one's behaviour to the specific situation.

The leader's approach should vary based on the readiness level of followers (their ability and willingness to perform tasks).

Ability to deliver

Ability to do a task is influenced by two factors

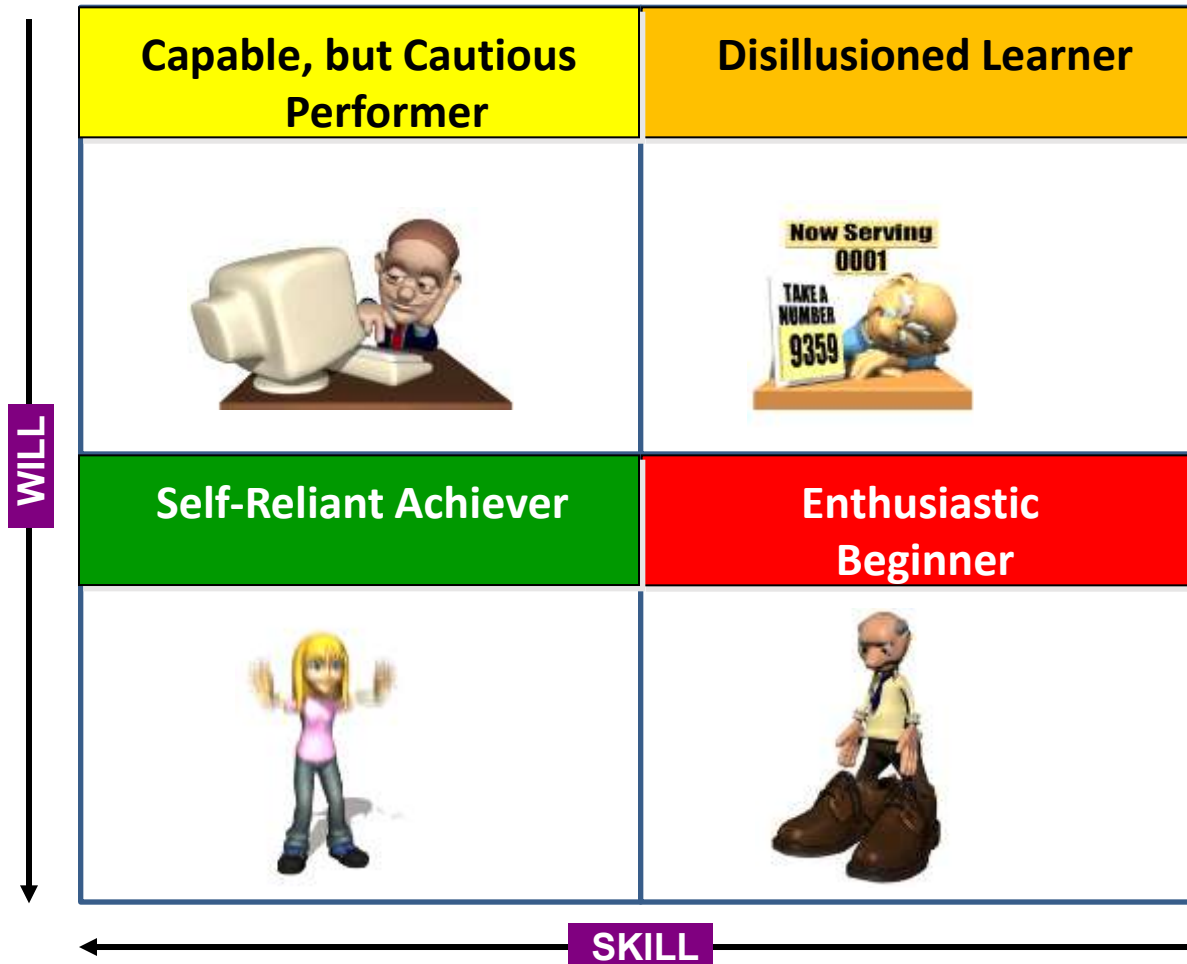

Blanchard's Situational Leadership Theory

There is no single best leadership style. Instead, effective leaders must adapt their style based on the maturity or development level of their followers.

The theory categorizes leadership behaviours into four styles: directing, coaching, supporting, and delegating, each suited to different follower readiness levels.

Professional maturity

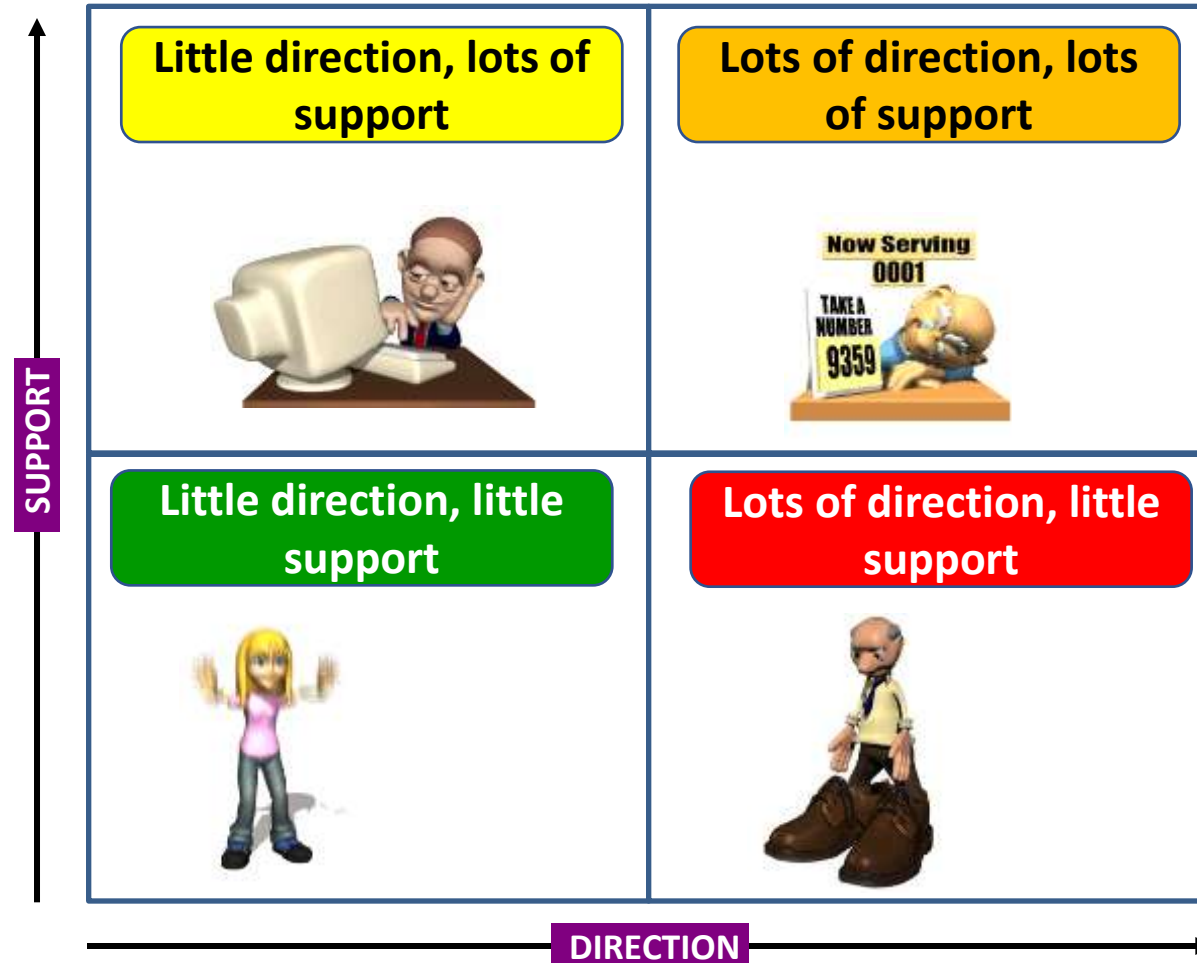

Development levels

- What would you give to these employees, if you were their manager?
- What do you think they need most from you to perform best?

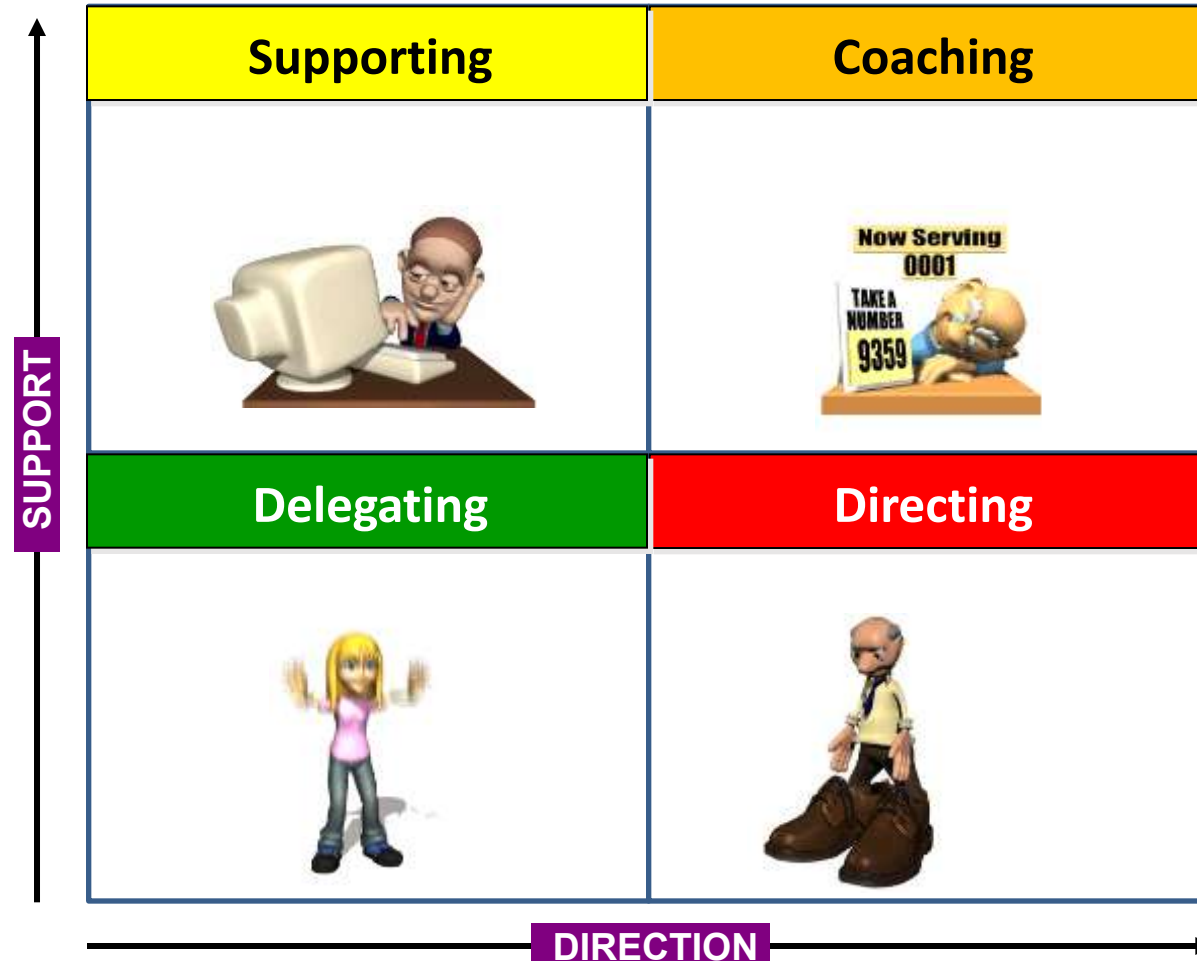

Partnering for Performance

Various needs at each stage

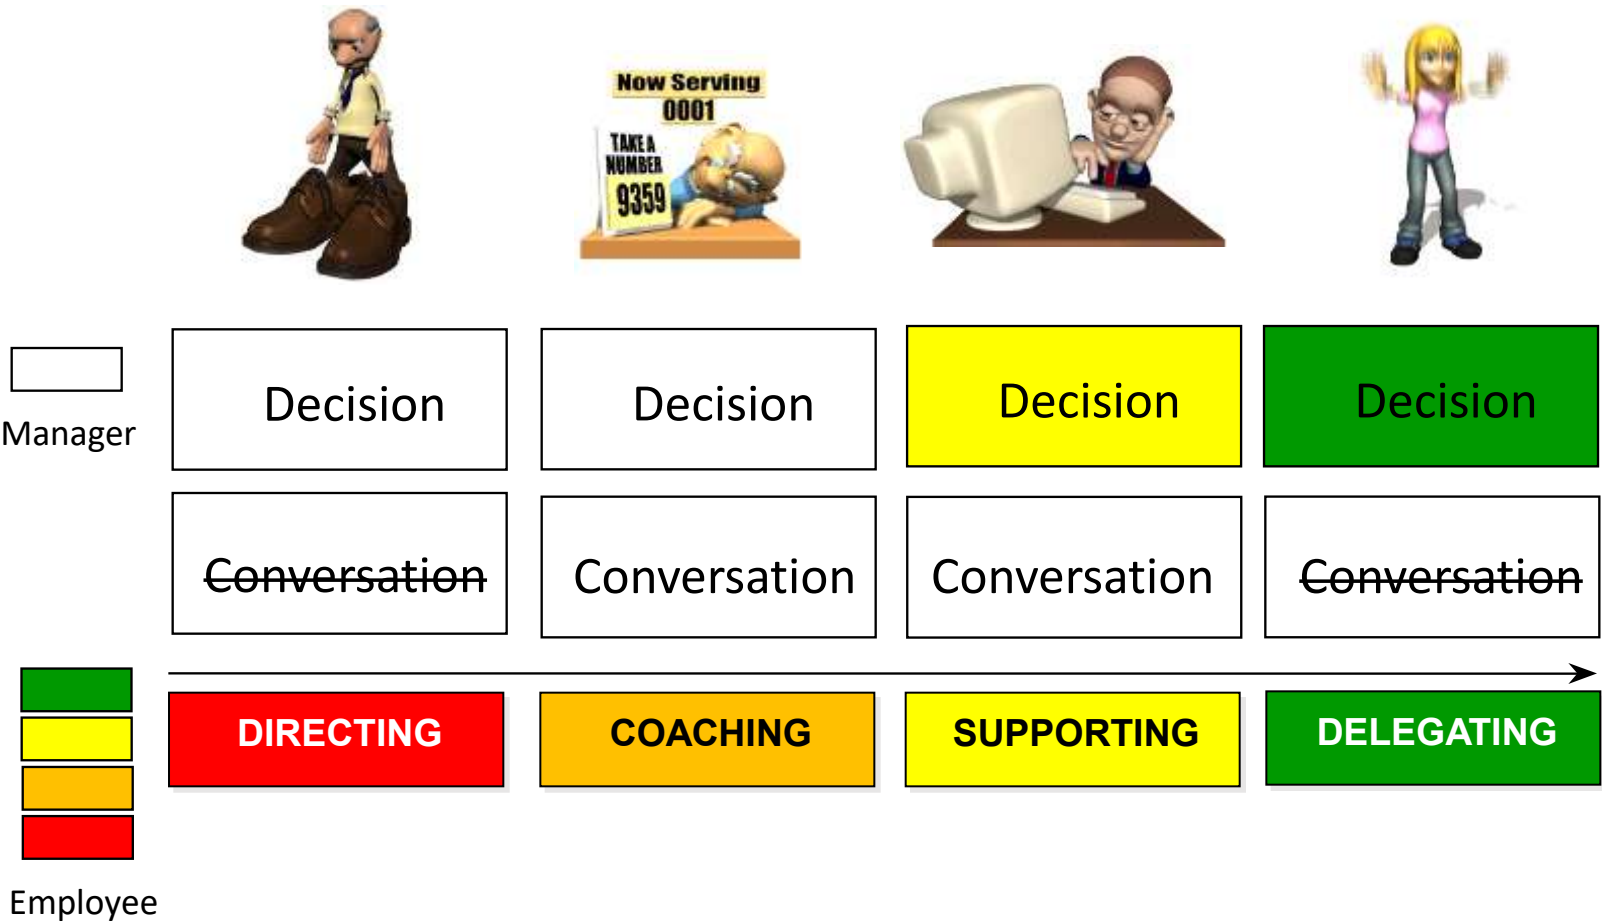

Partnering for Performance

Various needs at each stage

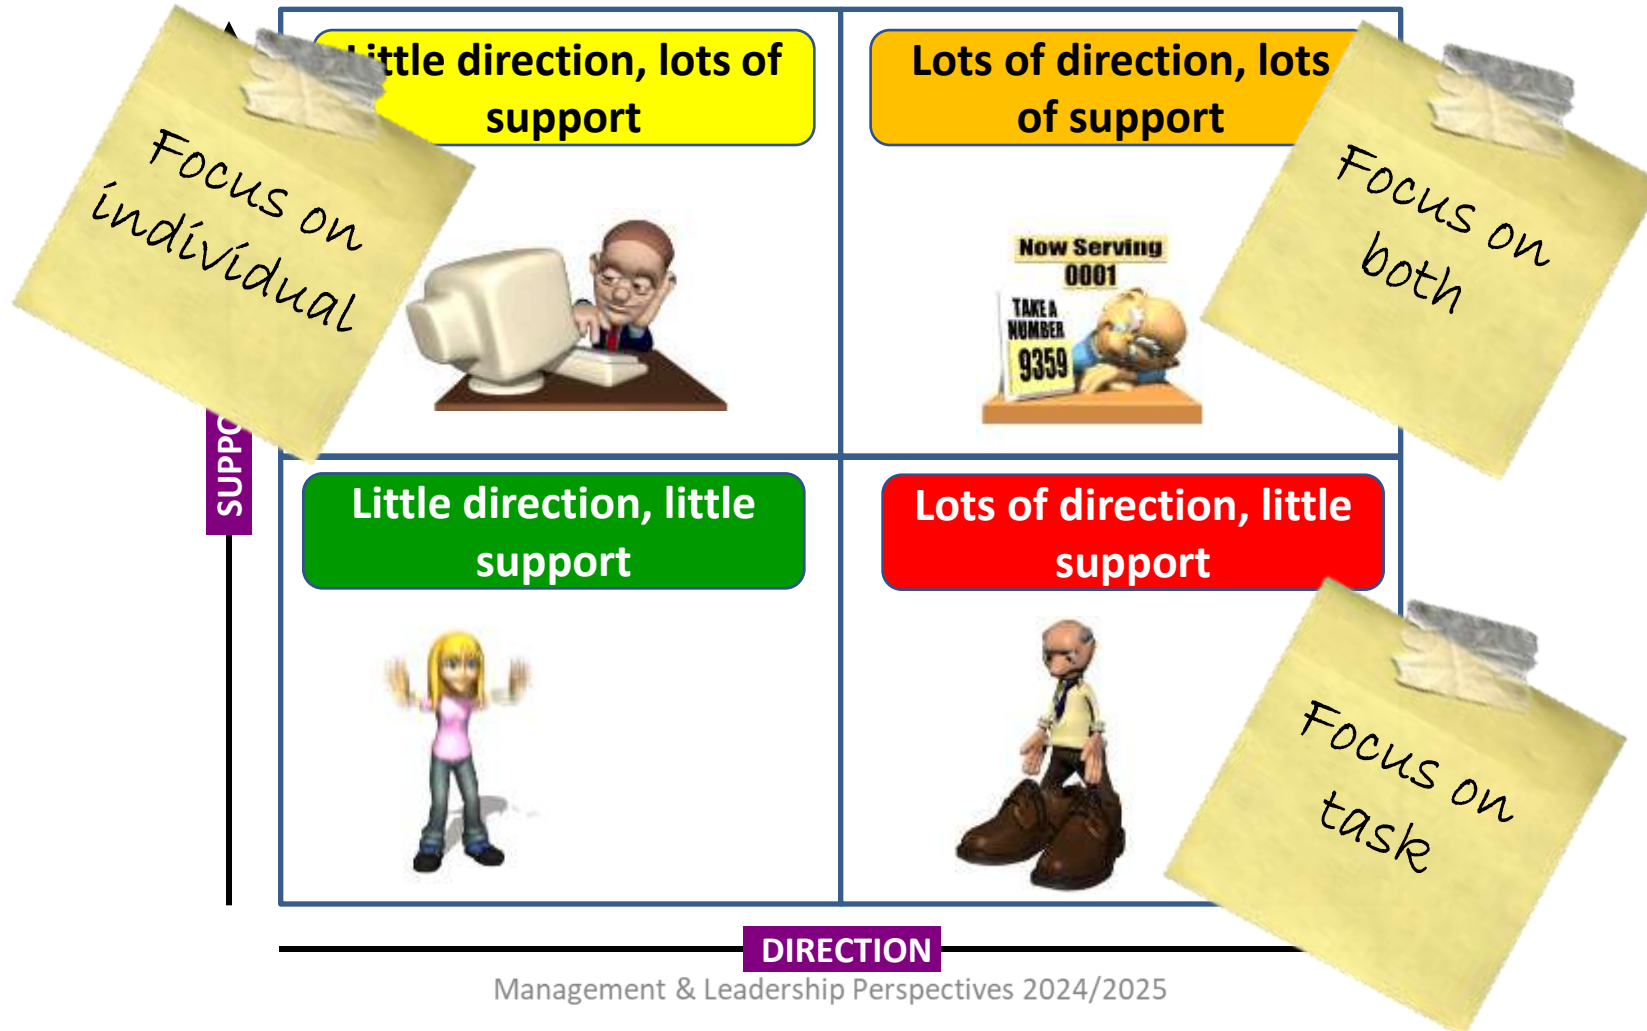

Professional maturity

Discussing and decision making

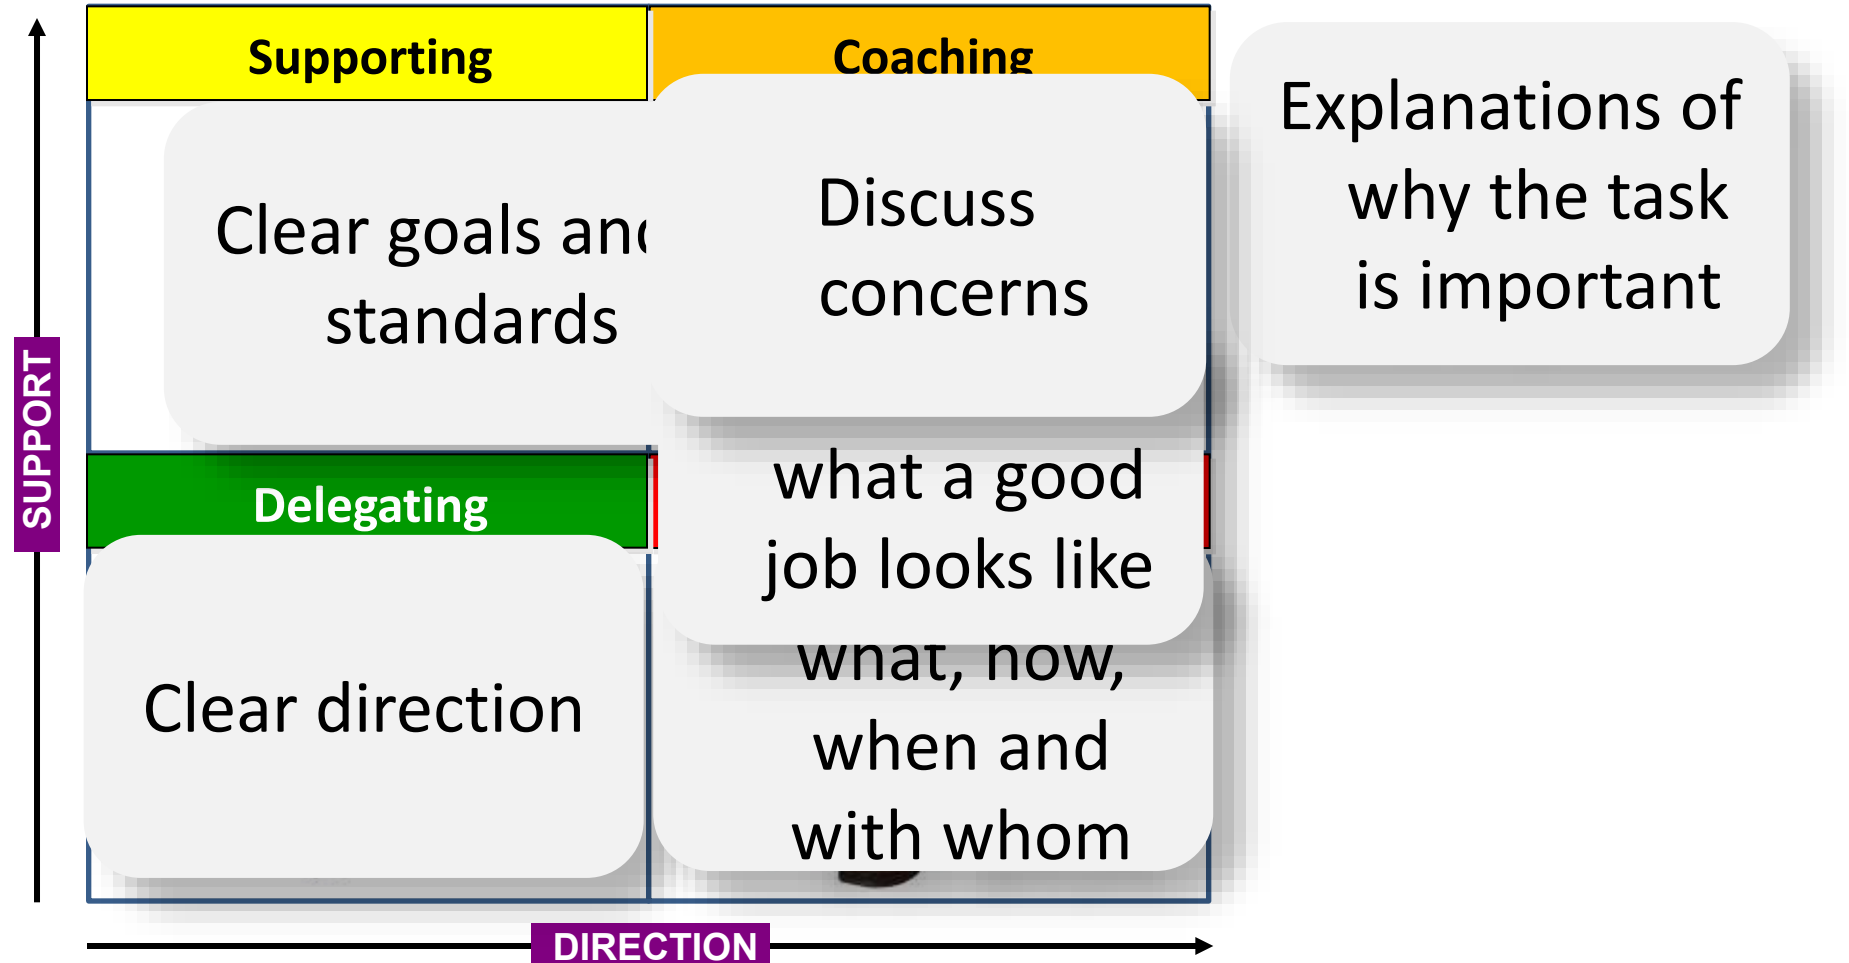

Partnering for Performance

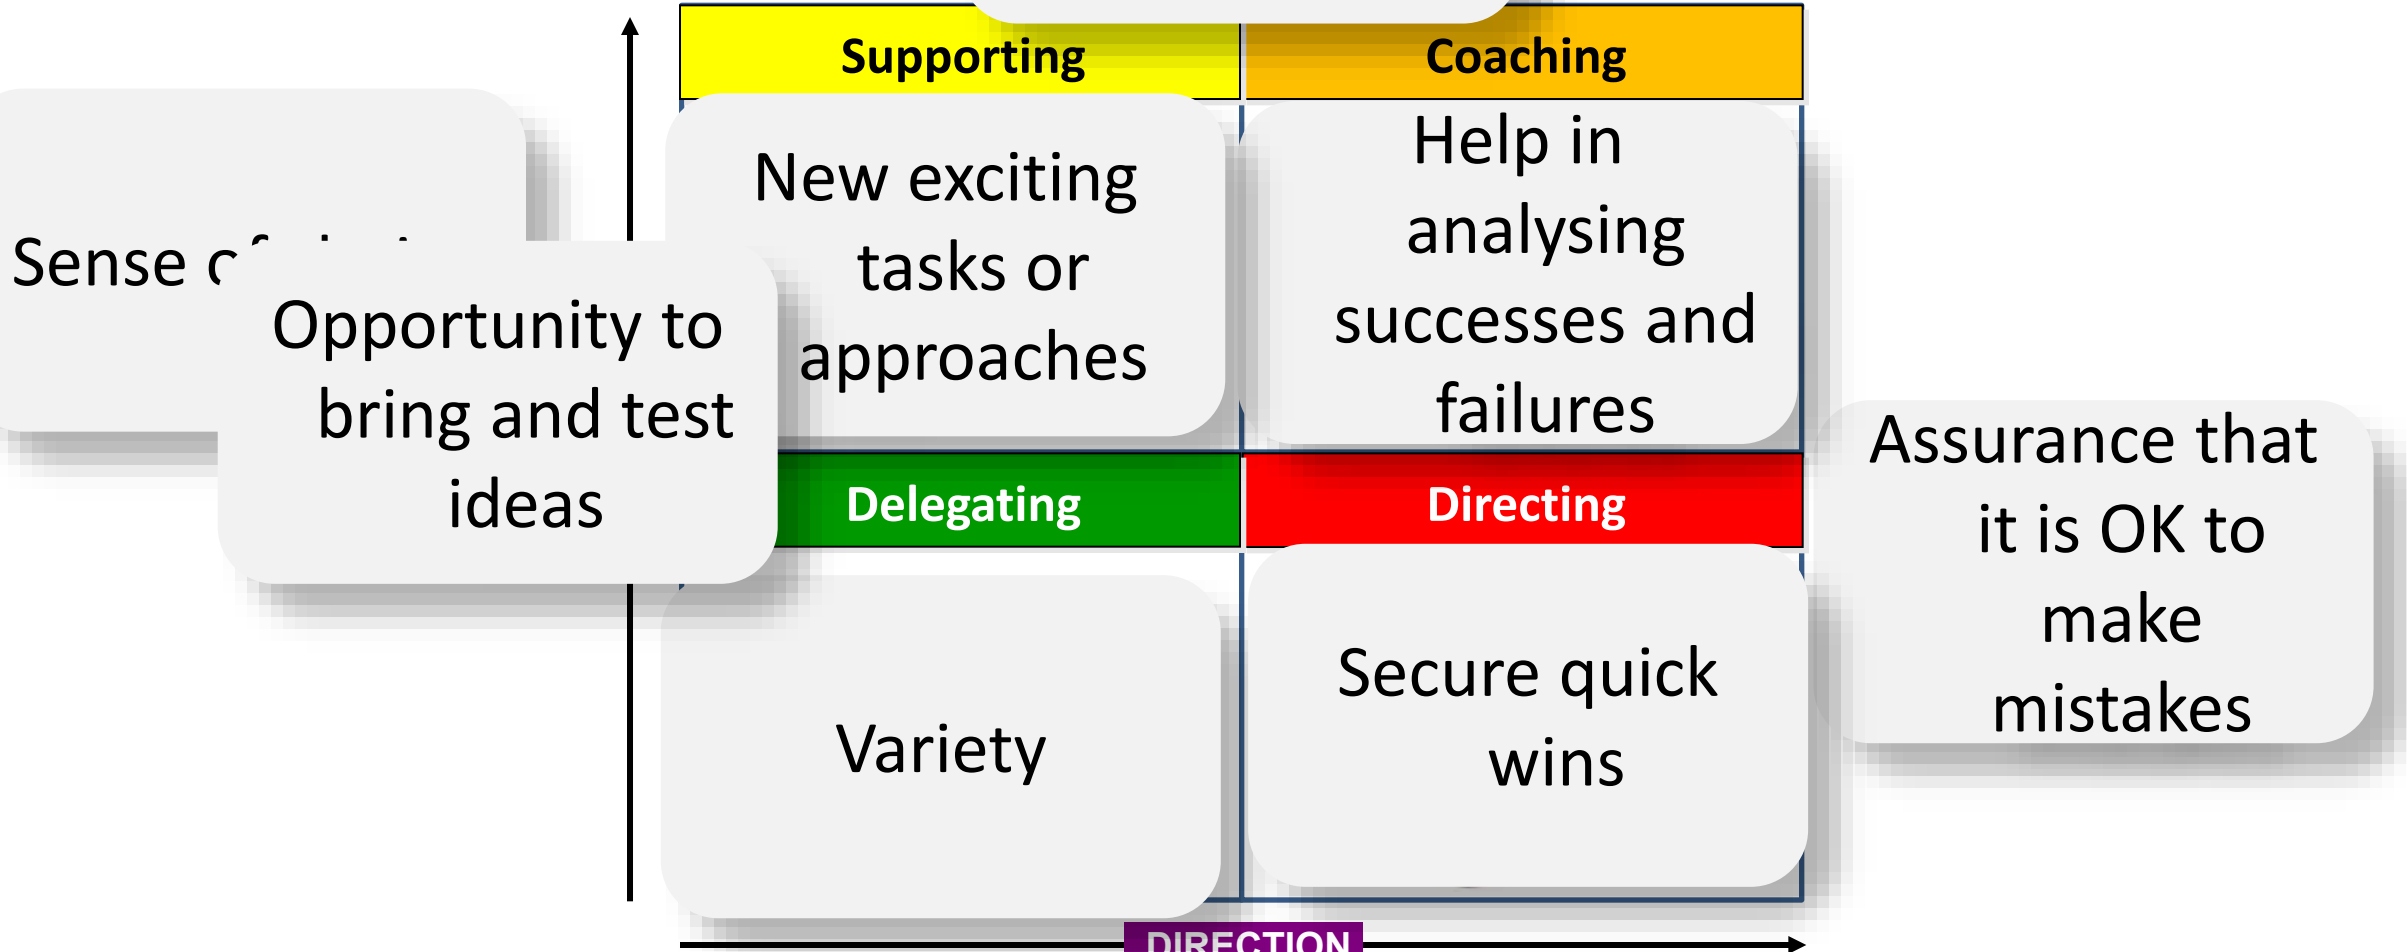

Various needs at each stage

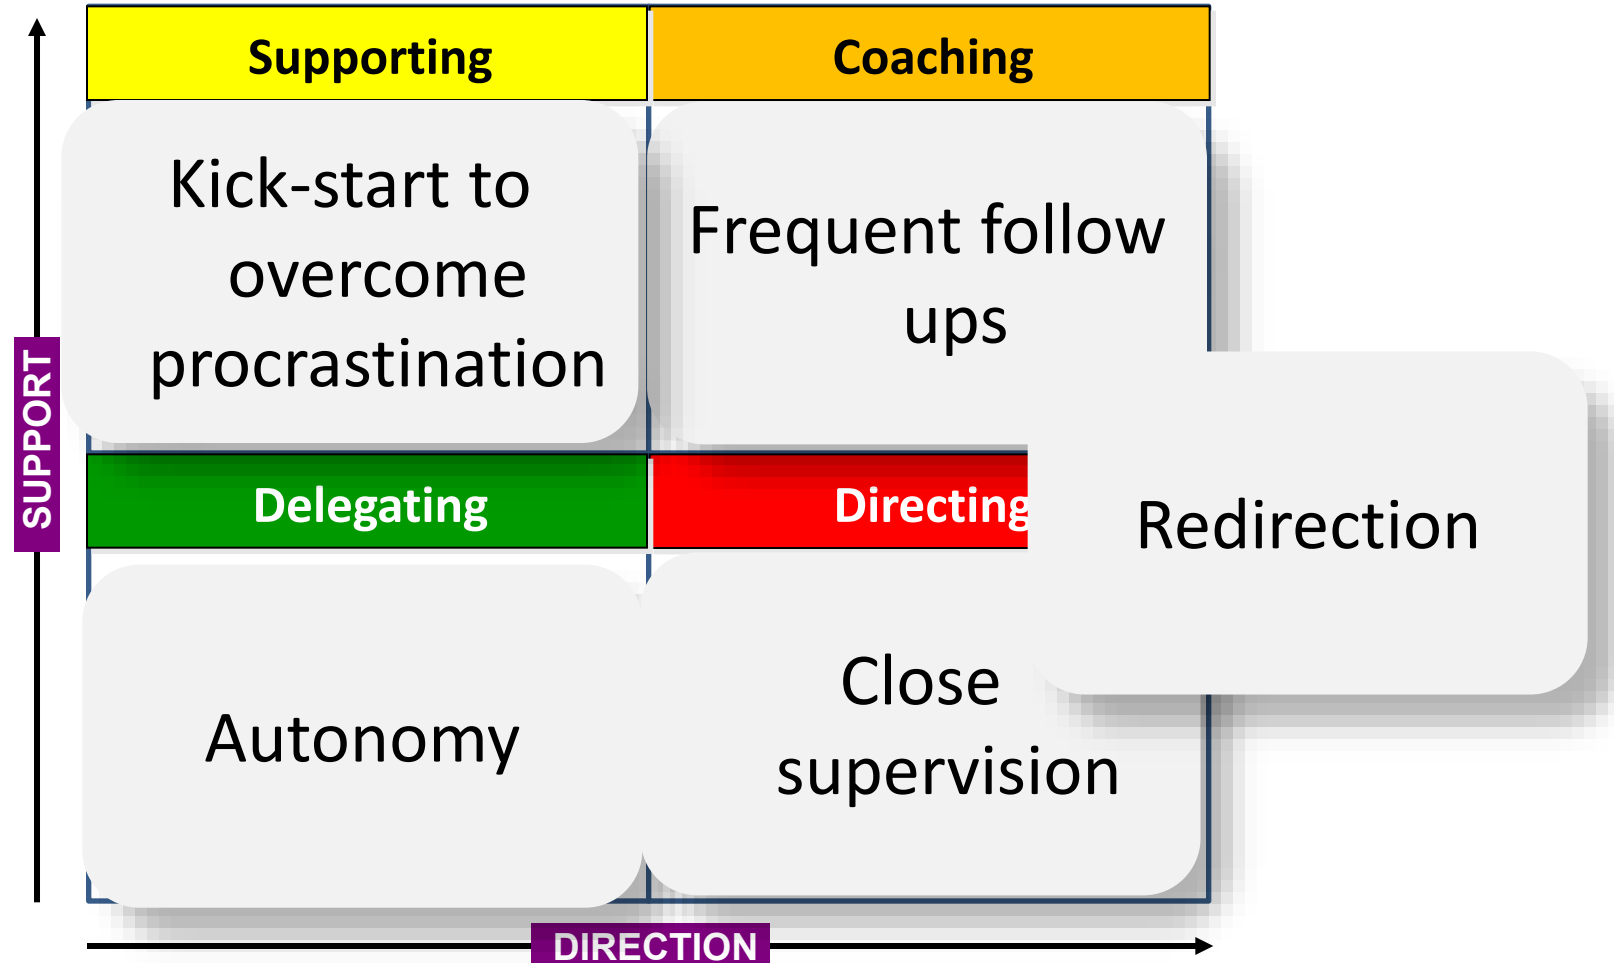

Delegation

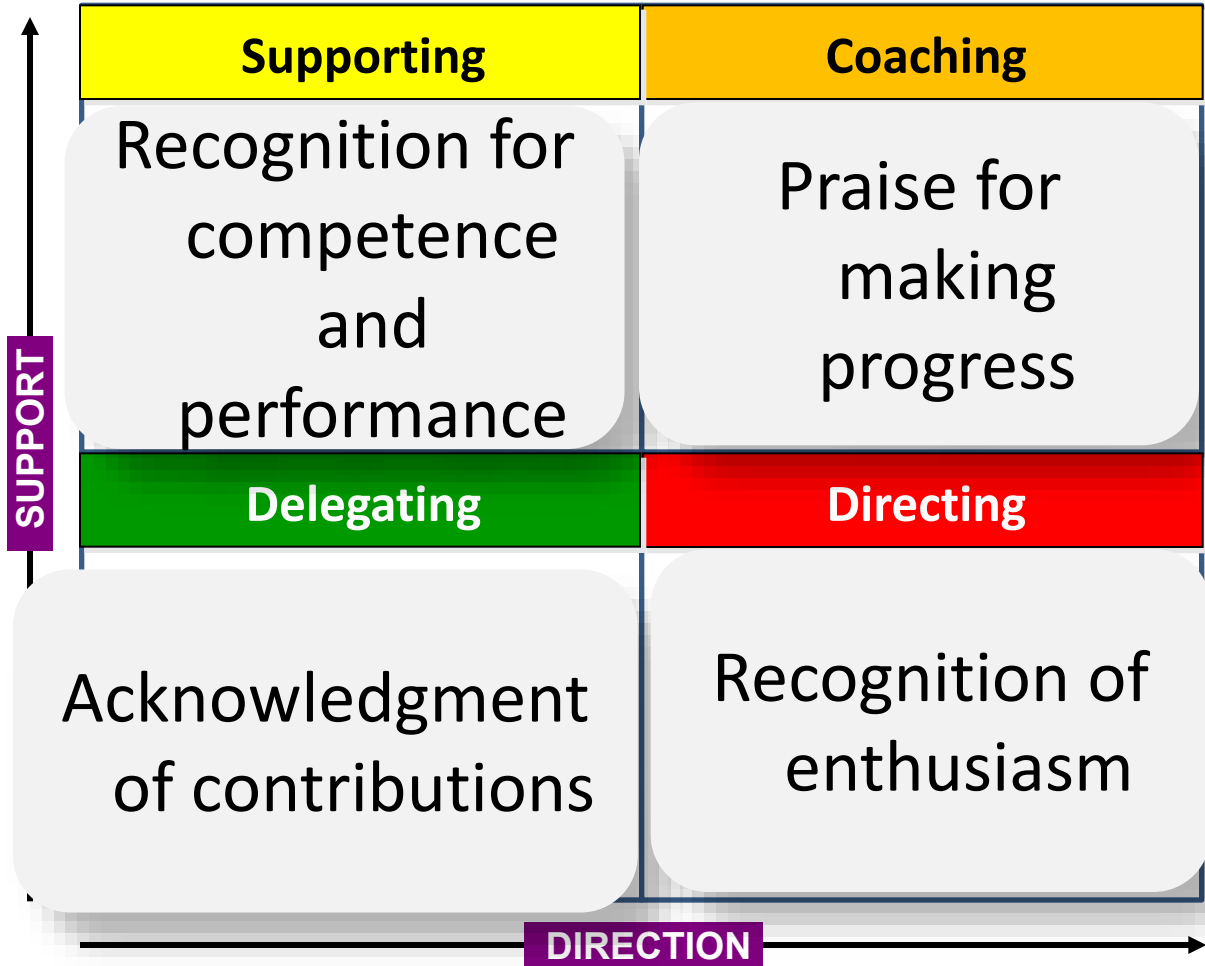

Motivation

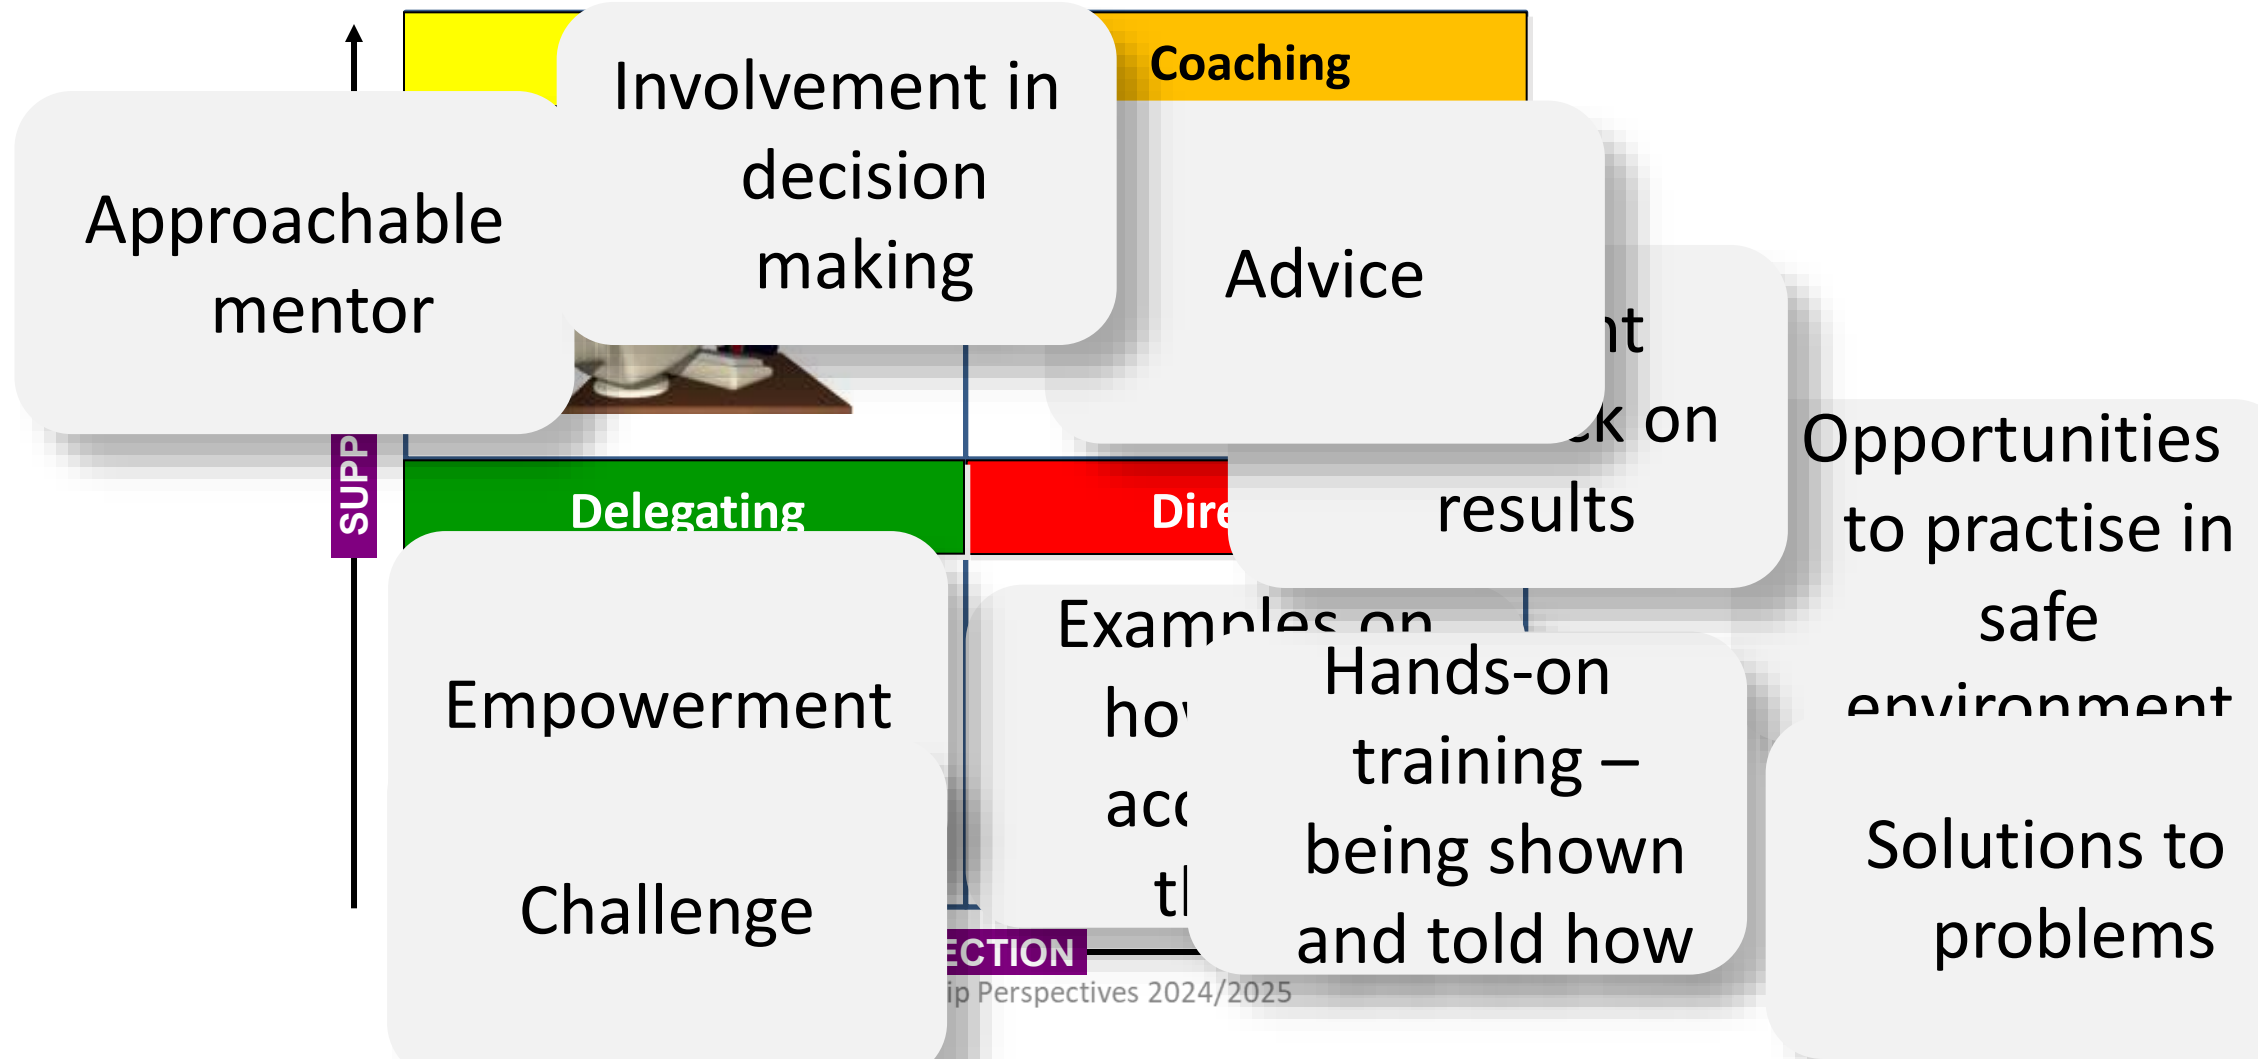

Supervision

Recognition

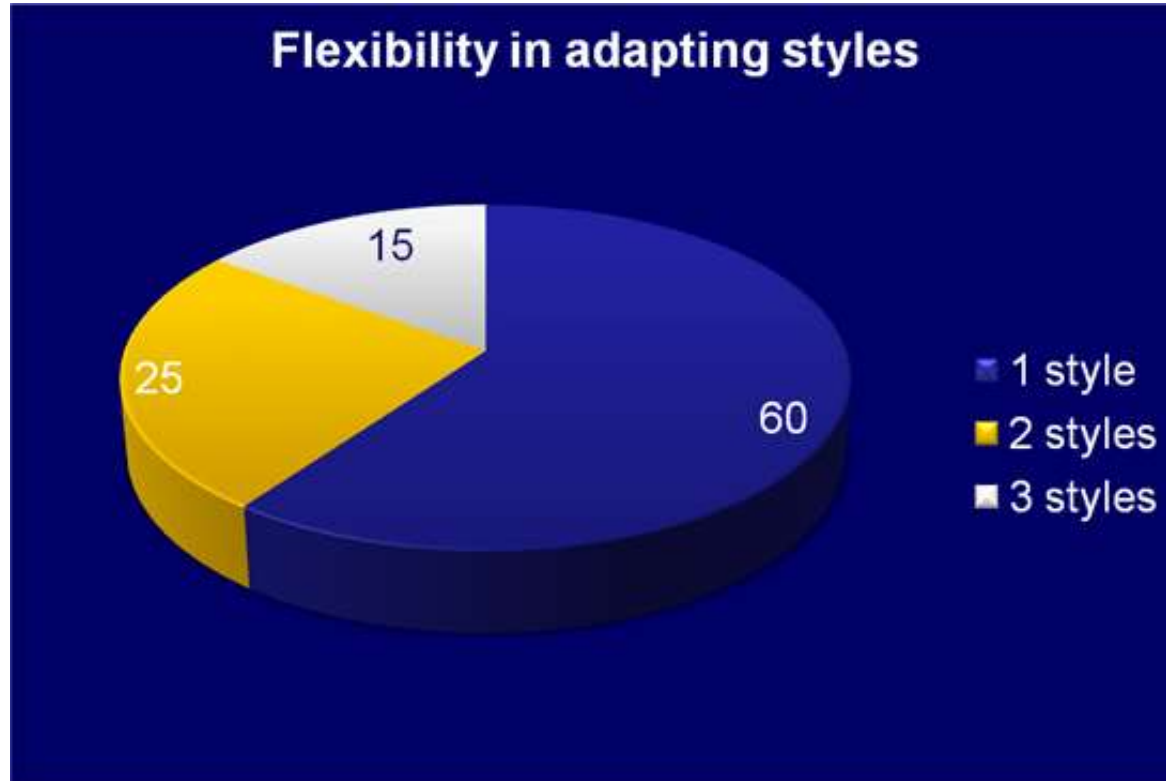

Development

Blanchard's Situational Leadership Theory

Discussion

- Are employees permanently linked to one of the 4 boxes / situations?
- What about managers? Supporting, coaching, delegating, directing... Have managers their preferred styles?
- What % of managers regularly apply at least 2 styles?

Homework

- Read the Netflix story – PDF here or on Teams
- Prepare for the Case Study on Crisis Management - Watch the movie that will appear on Teams soon, and follow instructions
- Read the following articles:

[Peter Drucker's Management Theory Explained \(business.com\)](#)

[The Fiedler Contingency Model of Leadership \(verywellmind.com\)](#) + test your leadership style
